(*incorporated as a stock corporation under the laws of the Republic of Austria; Austrian companies register number FN 79063 w*)

OBERBANK AG
DEBT ISSUANCE PROGRAMME

for the issuance of notes in bearer form and for the public offer and their admission to trading on the Official Market (*Amtlicher Handel*) of the Vienna Stock Exchange

Under the Debt Issuance Programme (the "**Programme**") described in this base prospectus (the "**Prospectus**"), Oberbank AG (the "**Issuer**" or "**Oberbank**") may from time to time issue notes in bearer form with the following ranking: (i) ordinary senior notes (Option I) (the "**Ordinary Senior Notes**"); (ii) covered bank bonds (*fundierte Bankschuldverschreibungen*) (Option II) (the "**Covered Bank Bonds**"); (iii) subordinated notes (Option III) (the "**Subordinated Notes**") and (iv) ordinary senior eligible notes or non-preferred senior eligible notes (Option IV) (the "**Ordinary Senior Eligible Notes**" or "**Non-Preferred Senior Eligible Notes**", together the "**Eligible Notes**" and all together, the "**Notes**"). **This Prospectus is valid for 12 months after its approval. The obligation by the Issuer to supplement this Prospectus in the event of significant new factors, material mistakes or material inaccuracies does not apply when this Prospectus is no longer valid.**

This Prospectus constitutes a base prospectus as defined in Article 8 of Regulation (EU) 2017/1129, as amended (the "**Prospectus Regulation**"), and is issued to update the prospectus dated 14 February 2020 as supplemented.

Application may be made to list Notes issued under the Programme on the Official Market (*Amtlicher Handel*) of the Vienna Stock Exchange (the "**Austrian Market**") or to include Notes issued under the Programme in the Vienna MTF of the Vienna Stock Exchange (*Wiener Börse*) which is a multilateral trading facility (MTF) (the "**Vienna MTF**"), or by way of notification of this Prospectus to the competent authorities on any regulated market in Germany (together with the Austrian Market, the "**Markets**") or on any multilateral trading facility in any of these countries. The Official Market of the Vienna Stock Exchange is a regulated market for the purposes of the Directive 2014/65/EU, as amended (*Markets in Financial Instruments Directive II* – "**MiFID II**"). Unlisted or unincluded Notes may also be issued pursuant to this Programme. The relevant Final Terms (as defined below) in respect of the issue of any Notes will specify whether or not such Notes will be (i) admitted to trading on one or more of the Markets or (ii) included in the Vienna MTF or in any other multilateral trading facility.

This Prospectus has been drawn up in accordance with Annexes 6, 14, 15, 22 and 28 of the Commission Delegated Regulation (EU) 2019/980, as amended and has been approved by the Austrian Financial Market Authority (*Finanzmarktaufsichtsbehörde* – "**FMA**") in its capacity as competent authority pursuant to Article 20 of the Prospectus Regulation in conjunction with the Austrian Capital Market Act 2019 (*Kapitalmarktgesetz 2019*). The Prospectus and any possible supplements thereto are available free of charge on the Issuer's website www .oberbank.at under the menu item "Investor Relations" / "Anleiheemissionen". The Issuer has requested the FMA to provide the competent authority in the Federal Republic of Germany with a certificate of approval attesting that this Prospectus has been drawn up in accordance with Prospectus Regulation. The Issuer may request the FMA to provide competent authorities in additional member states within the European Economic Area ("**EEA**") with a notification.

The Issuer may offer the Notes under this Programme publicly or non-publicly. Public offers of Notes will only be made in Austria and Germany or any other member states within the EEA in which this Prospectus has been notified. The Issuer reserves the right to offer the Notes also by way of private placements in other jurisdictions.

The specific final terms of each issuance of Notes will be determined at the time of offering of such issuance of Notes based on then prevailing market conditions and will be set forth in the applicable final terms (the form of which is contained herein) (the "**Final Terms**").

Prospective investors should have regard to the factors described under the section headed "Risk Factors" in this Prospectus. This Prospectus does not describe all of the risks of an investment in the Notes, but the Issuer believes that all material and specific risks relating to an investment in the Notes have been described pursuant to Article 16 of the Prospectus Regulation. Any decision to purchase the Notes should be made on a consideration of this Prospectus and including the relevant Final Terms and the summary of the individual issue ("**Issue Specific Summary**") annexed to the relevant Final Terms.

The FMA only approves this Prospectus as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of the Issuer and the quality of the Notes that are the subject of this Prospectus. Investors should make their own assessment as to the suitability of investing in the Notes.

Important Notice

This Prospectus does not constitute an offer of, or an invitation by or on behalf of the Issuer to subscribe for, or purchase, any Notes.

This Prospectus is to be read in conjunction with all of the parts of documents which are incorporated herein by reference (see the section "Documents Incorporated by Reference").

No person has been authorized to give any information or to make any representation other than those contained in this Prospectus in connection with the issuance or sale of the Notes and, if given or made, such information or representation must not be relied upon as having been authorized by the Issuer. Neither the delivery of this Prospectus nor any sale made in connection herewith shall, under any circumstances, create any implication that there has been no change in the affairs of the Issuer since the date hereof or the date upon which this Prospectus has been most recently amended or supplemented or that there has been no adverse change in the financial position of the Issuer since the date hereof or the date upon which this Prospectus has been most recently amended or supplemented or that any other information supplied in connection with the Programme is correct as of any time subsequent to the date on which it is supplied or, if different, the date indicated in the document containing the same. This Prospectus may only be used for the purposes for which it has been published.

The content of this Prospectus is not to be regarded as legal, economic or tax advice. Investors shall in any case consult qualified experts before any investment decision in Notes. Investors shall make their own assessment of the legal, tax, financial and other consequences connected with purchasing any Notes under this Programme.

Any person subsequently offering, selling or recommending the Notes (a "**Distributor**") *should take into consideration such target market assessment; however, a Distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.*

A determination will be made in relation to each issue about whether, for the purpose of the Product Governance Rules under the Delegated Directive 2017/593, as amended (the "**MiFID II Product Governance Rules**")*, any dealer subscribing for any Notes is a manufacturer in respect of such Notes, but otherwise any financial intermediaries nor any of their respective affiliates will be a manufacturer for the purpose of the MiFID II Product Governance Rules.*

*The relevant Final Terms in respect of any Notes may include a legend entitled "UK MiFIR Product Governance" which will outline the Issuer's target market assessment in respect of the Notes and which channels for distribution of the Notes are appropriate. A Distributor should take into consideration such target market assessment; however, a Distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the "**UK MiFIR Product Governance Rules**") is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the target market assessment) and determining appropriate distribution channels.*

A determination will be made in relation to each issue about whether, for the purpose of the UK MiFIR Product Governance Rules, any dealer subscribing for any Notes is a manufacturer in respect of such

SUPPLEMENT TO THIS PROSPECTUS

The Issuer is obliged by the provisions of the Prospectus Regulation, that if at any time during the duration of the Programme there is a significant new factor, material mistake or inaccuracy relating to information contained in this Prospectus which is capable of affecting the assessment of any Notes and which arises or is noted between the time when this Prospectus is approved and the final closing of an offer of such Notes to the public or, as the case may be, the time when trading on a regulated market begins, whichever occurs later, the Issuer shall prepare a supplement to this Prospectus or publish a replacement Prospectus for use in connection with any subsequent offering of the Notes and shall supply to the FMA and the stock exchange operating the Markets such number of copies of such supplement or replacement hereto as relevant applicable legislation require.

SOURCE OF INFORMATION

Unless otherwise stated, statistical and other data provided in this Prospectus has been extracted from the Audited Consolidated Financial Statements 2019 as well as the Unaudited Interim Financial Statements as of 30 September 2020. The Issuer confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such sources, no facts have been omitted which would render the reproduced information inaccurate or misleading.

FORWARD LOOKING STATEMENTS

This Prospectus contains certain forward-looking statements. A forward-looking statement is a statement that does not relate to historical facts and events. They are based on analyses or forecasts of future results and estimates of amounts not yet determinable or foreseeable. These forward-looking statements are identified by the use of terms and phrases such as "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "predict", "project", "will" and similar terms and phrases, including references and assumptions. This applies, in particular, to statements in this Prospectus containing information on future earning capacity, plans and expectations regarding the Issuer's business and management, its growth and profitability, and general economic and regulatory conditions and other factors that affect it. Forward-looking statements in this Prospectus are based on current estimates and assumptions that the Issuer makes to the best of its present knowledge. These forward-looking statements are subject to risks, uncertainties and other factors which could cause actual results, including the Issuer's financial condition and results of operations, to differ materially from and be worse than results that have expressly or implicitly been assumed or described in these forward-looking statements. The Issuer's business is also subject to a number of risks and uncertainties that could cause a forward-looking statement, estimate or prediction in this Prospectus to become inaccurate. Accordingly, investors are strongly advised to read the following sections of this Prospectus: "Risk Factors" and "Oberbank AG". These sections include more detailed descriptions of factors than the ones contained in this section that might have an impact on the Issuer's business and the markets in which it operates.

In light of these risks, uncertainties and assumptions as well as future events described in this Prospectus may not occur. In addition, the Issuer assumes no obligation, except as required by law, to update any forward-looking statement or to conform these forward-looking statements to actual events or developments.

CONSENT TO THE USE OF PROSPECTUS

The Issuer may grant its individual consent and/or general consent to the use of this Prospectus for certain jurisdictions (for Austria and/or Germany) or may not give such consent at all, as specified in the relevant Final Terms.

If no consent is given, financial intermediaries are not allowed to use this Prospectus with respect to any Notes issued thereunder.

If the Issuer grants its individual consent, the Issuer offers to certain financial intermediaries (individual consent) to conclude an agreement for the use of this Prospectus and any possible supplements thereto for the subsequent resale or final placement of Notes (*distribution actions*). Such agreement will be concluded with each relevant financial intermediary by carrying out the first distribution action (factual acceptance). Any financial intermediary to whom such offer is made shall be named in the Final Terms together with the jurisdictions such individual consent applies to.

The Issuer further reserves the option to give a general consent to all credit institutions as financial intermediaries which are licensed according to the Directive 2013/36/EU, as amended (*Capital Requirements Directive IV* – "**CRD IV**") in an EEA member state and are authorized to conduct securities issuances business or the distribution of notes to the use of this Prospectus with respect to certain individual issuances under this Prospectus. The Final Terms shall specify the jurisdictions such general consent will apply to.

If an individual or general consent is given, the following applies:

The Issuer accepts responsibility for the content of this Prospectus with respect to subsequent resale or final placement of Notes by any financial intermediary which has been given consent to use this

Prospectus. However, the Issuer does not accept any liability for actions or omissions of such financial intermediaries. This consent is given until the end of the validity of this Prospectus and only for such jurisdictions as specified in the relevant Final Terms. The offer period upon which subsequent resale or final placement of the Notes by financial intermediaries can be made will be specified in the Final Terms. The Issuer reserves the right to rescind the consent at any time in its sole discretion. Any other clear and objective conditions attached to the consent which are relevant for the use of the Prospectus, if applicable, will be specified in the Final Terms. This consent explicitly does not exempt from complying with applicable sales restrictions and with all applicable provisions of the respective offer, as well as from assessing the target market and the appropriate distribution channels with respect to the Notes according to MiFID II or UK MiFIR Product Governance Rules, respectively, by taking into account the Issuer's specifications thereto. A financial intermediary is not exempt from complying with any provisions applicable to the financial intermediary. The Issuer may revoke the above with immediate effect without giving any reasons.

In case the Issuer does not give a general consent to the use of this Prospectus, any new information with respect to financial intermediaries unknown at the time of the approval of the Prospectus will be published on the Issuers website (www .oberbank.at under the sections "Investor Relations" / "Anleiheemissionen").

In the event of an offer being made by a financial intermediary, such financial intermediary will provide information to investors on the terms and conditions of the offer at the time the offer is made.

In case the Issuer gives a general consent to the use of this Prospectus, the following applies:

Any financial intermediary using this Prospectus has to state on its website that it uses the Prospectus in accordance with the consent and the conditions attached thereto.

The relevant Final Terms of each Note will specify whether the Issuer gives its individual consent or general consent to the use of this Prospectus or no such consent at all.

RESPONSIBILITY STATEMENT

Oberbank, with its registered office in Untere Donaulände 28, 4020 Linz, Austria, is solely responsible for the information contained in this Prospectus and declares that, having taken all reasonable care to ensure that such is the case, the information contained in the Prospectus is, to the best of its knowledge, in accordance with the facts and that the Prospectus makes no omission likely to affect its import.

1. RISK FACTORS

The following is a disclosure of risk factors that are material for the Issuer, the Oberbank Group (as defined below) and the Notes issued under the Programme in order to assess the market risk associated with these Notes. Prospective investors should consider these risk factors before deciding to purchase Notes issued under the Programme, especially since in certain cases the investor may lose its entire investment or parts of it.

Prospective investors should consider all information provided in this Prospectus and consult with their own professional advisers (including their financial, accounting, legal and tax advisers) if they consider it necessary. In addition, investors should be aware that the risks described may combine and thus intensify one another.

The following is a disclosure of risks that may affect the Issuer's ability to fulfill its obligations under the Notes. Prospective investors should consider these risks before deciding to purchase Notes to be issued under the Programme.

The following statements are not exhaustive. Other risks of which the Issuer is currently not aware or which it does not consider to be material, but which may also affect the Issuer's ability to fulfill its obligations under the Notes may be of significance.

1.1. RISK FACTORS REGARDING THE OBERBANK GROUP'S BUSINESS OPERATIONS

A materialisation of the risk of default on agreed payments or deterioration in credit quality, particularly as a result of the deterioration in economic conditions, could result in credit losses which exceed the amount of Oberbank's loan loss provisions and thus, could materially negatively affect the financial position of Oberbank.

Credit risk is the risk of partial or complete default of agreed payments, in particular interest and/or principal payments, to be made by a debtor to the Oberbank Group or deterioration in the quality of the Issuer's loan portfolio (due to deterioration in economic conditions). Due to its business model, credit risk is the most significant risk for the Oberbank Group, as it exists both, for traditional banking products such as lending, discount and guarantee business and as counterparty risk for certain commercial products such as derivatives such as forward transactions, swaps, options and repurchase transactions as well as securities lending (repo) transactions.

A significant proportion of the Issuer's loan portfolio consists of mortgage-backed loans. A drastic fall in real estate prices would jeopardize the repayment of real estate loans, or the lower real estate price would result in a loan default if the real estate collateral were to be realized.

Due to Oberbank's market position as a regional bank for companies (corporate customers) in the core markets of Upper Austria and Salzburg, an economic crisis in this economic region would have a greater impact on Oberbank's credit risk than for other banks. This could lead to a deterioration in credit quality and an increase in non-performing loans of the Issuer. The occurrence of the credit risk can result in credit losses which exceed the amount of Oberbank's loan loss provisions and could thus, materially negatively affect the financial position of Oberbank and accordingly, its ability to service its obligations under the Notes.

Losses in value from Oberbank Group's participations can have a negative effect on the Oberbank Group's net assets, financial position and results of operations.

The investment risk for the Issuer includes potential declines of proceeds derived from dividend payments, the writedown and losses in divestments with respect to the Oberbank Group's participations. Oberbank Group also holds investments in a few listed companies whose performance depends on a variety of factors that are not within the control of the Oberbank Group and can have a material negative effect on the valuation of Oberbank's assets. The carrying value of Oberbank's participations in companies valued at equity, i.e. BKS Bank AG ("**BKS**"), Bank für Tirol und Vorarlberg Aktiengesellschaft ("**BTV**"), voestalpine AG ("**voestalpine**") amounted to EUR 914.1 million as of 31 December 2019. Due to the size of the investment (currently approx. 8% of voestalpine's share capital), the most material negative effect may result from the investment in voestalpine. Losses in value from Oberbank Group's participations can have a negative effect on the Oberbank Group's net assets, financial position and results of operations.

Changes in market prices can have a material negative effect on Oberbank's assets and profitability.

The conditions on the financial markets have a significant influence on the Issuer's business activities. Changes in market prices, particularly because of changes in interest rates, stock prices, commodity prices and foreign exchange rates and credit spreads can have a material negative effect on Oberbank. This can result in negative changes in the values of assets and derivatives in the Oberbank's banking and trading book. Due to the Oberbank's business model, a special form of market risk is interest rate risk in its banking book. Oberbank's interest rate risk results from any mismatch between the fixed interest rates from lending and deposit business and the fluctuations in the underlying market interest rates over time. The realization of market risk can have a material adverse effect on the Oberbank Group's results of operations.

The worldwide corona virus (COVID-19) pandemic may have significant effects on Oberbank and its clients.

Oberbank is directly and through its clients exposed to certain risks in relation to the worldwide pandemic caused by the corona virus SARS-CoV-2 ("**COVID-19**") and the measures taken by sovereigns, companies and others to prevent the spread of the virus. The worldwide rapid spread of the COVID-19 pandemic, the interim lockdown and the resulting business restrictions and cutbacks have led to deterioration of financial conditions of some Oberbank's customers, in general, and certain businesses, e.g. air transportation, travel, tourism and oil industry, in particular. As a result, Oberbank's loan portfolio quality could suffer or deteriorate, and non-performing loans may increase, because Oberbank's customers may not, or not timely, be able to repay their loans, and/or collateral securing these loans may become insufficient. If the economic conditions worsen beyond the level foreseen, this could result in credit losses exceeding the amount of Oberbank's loan loss provisions.

In response to the COVID-19 pandemic and the expected economic crises, governments, central banks and bank regulators in countries in which Oberbank operates have already taken and are likely to take unexperienced state intervention measures, such as imposing payment moratoria, caps on interest rates and limiting or reducing legal remedies to collect amounts due, etc. to protect their citizens, national economies, currencies or fiscal income. Any of these or similar state intervention measures could have a material adverse effect on Oberbank's business, financial condition and results of operations through any individual or a combination of less interest income, higher risk costs or higher other costs.

Governmental measures to confine the COVID-19 pandemic may directly negatively impact Oberbank's business operations should its employees fall ill, be isolated or should business premises be locked or shut down. Also, travel restrictions, like border closures, and full or partial curfews may negatively affect Oberbank's operations, and may also limit Oberbank's ability to source new business through personal visits of customers. Any of these or similar governmental programmes/measures may not be sufficient to curb the negative effects for the economy and for Oberbank.

The COVID-19 pandemic may also have a negative impact on the market value of the assets that are financed by Oberbank, serve as collateral for Oberbank's repayment claims and/or are included in Oberbank's cover pool. This is especially due to the risk of high vacancies in (or rent holidays in relation to) commercial properties, such as hotels, retail centers, cancellation of trade fairs and exhibitions and potential bankruptcies of tenants, sponsors, guarantors and other providers of collateral, which may impair the solvency of clients of Oberbank and may lead to defaults under financings provided by Oberbank.

Furthermore, the COVID-19 pandemic might lead to a second wave of asset price adjustments and an increased volatility in stock exchange prices as well as to a rise in spreads, which might have a negative impact on the Issuer's refinancing costs.

Oberbank is exposed to the risk of losses resulting from inadequate or failed internal processes, systems and procedures, personnel or as a result of the occurrence of external events which could have a negative impact on the assets, financial and earnings position of the Oberbank Group.

Operational risks for Oberbank Group comprise the risk of losses resulting from the inadequacy or failure of internal processes, systems and procedures, personnel or the occurrence of external events. These include internal risks such as theft and fraud by personnel, development and process failures, interruption of operations and lack of human resources as well as external risk factors such as property damage and fraud by customers (fraud risk). The realization of such risks can lead to increased costs or loss of earnings for the Oberbank Group. The Oberbank Group's business activities

depend to a large extent on the functionality of its communication and data processing systems (IT systems). Malfunctions, disruptions and security gaps can lead to failures or interruptions of systems for customer relations, accounting, securities account management, support and/or customer management. Failures and interruptions of data processing/IT systems can impair the operation of the various business areas of the Oberbank Group and thus significantly affect the net assets, financial position and results of operations of the Oberbank Group. In addition, the threat from cyber risks is increasing. External attacks on the assets of the Oberbank or its customers can lead to a negative public perception of Oberbank (reputation risk) and to a negative impact on the assets, financial and earnings position of the Oberbank Group.

Risk that due to the varying maturities of claims and obligations the Oberbank Group cannot fully or timely fulfil its current or future obligations which may result in customers withdrawing a large proportion of their deposits and substitution being possible only at higher costs.

Due to the varying maturities of the Oberbank Group's receivables and liabilities, there is a risk that Oberbank Group may not fully or timely meet its current and future payment obligations or will only be able to refinance at higher costs in the future. Due to its business model (as a universal bank), customer deposits account for a large proportion of Oberbank's total financing. A negative public perception of Oberbank (reputation risk) due to the occurrence of material risks (e.g. credit risk, cyber risk) may result in customers withdrawing a large proportion of their deposits and substitution being possible only at higher costs. This may negatively affect Oberbank's ability to service its obligations under the Notes.

Risk that the Oberbank Group's net interest income will be negatively influenced by the interest rate policy of the central banks.

A considerable part of Oberbank's operating income results from net interest income. The current low-interest policy of the European Central Bank could lead to a decline in net interest income at the Oberbank Group. While interest rates in the investment area (lending and securities business) are falling, negative interest rates can only be passed on to a lesser extent in the deposit business. This could have a negative impact on the Oberbank Group's net assets, financial position and results of operations.

Credit rating agencies may suspend, downgrade or withdraw a credit rating of the Issuer, and such action might negatively affect the refinancing conditions for the Issuer, in particular its access to debt capital markets.

Oberbank has obtained a credit rating from the credit rating agency S&P Global Ratings Europe Limited ("**S&P**"). Such credit rating is an assessment by a credit rating agency of the creditworthiness of the Issuer and the probability of default by the Issuer on the basis of creditworthiness criteria. Public external ratings are capable of influencing the reputation of rated debtors or triggering purchase or sale decisions by private or institutional investors. A credit rating agency may suspend, downgrade or withdraw a credit rating. A credit rating may also be suspended or withdrawn if the Issuer terminates the agreement with the credit rating agency concerned or determines that it would not be in its interest to continue to provide financial information to a credit rating agency. A deterioration in the economic circumstances of the Issuer (e.g. financial, liquidity or earnings situation) may result in a change in the credit rating of the Issuer. A downgrade of the credit rating of Oberbank may have a negative impact on Oberbank's credit spreads. Any increase in credit spreads causes higher refinancing costs and may have a material negative impact on the Oberbank Group's earnings position.

1.2. RISK FACTORS REGARDING THE LEGAL FRAMEWORK

Oberbank is exposed to the risk of increased expenses due to changes in legal regulations or changes in their interpretation, in particular with regard to labour, social, consumer protection, tax, pension law and accounting principles.

In addition to banking regulation provisions, the Issuer must comply with a series of European and national regulations, in particular with regard to labour, social, tax, and pension law. These legal regulations continue to evolve, as does their interpretation by courts and administrative authorities.

Changes in the area of consumer protection can have a negative effect on commissions which the Issuer collects from its customers (in particular consumers) and, thus, may lead to lower commission income.

Stability fees or special banking taxes, possible changes to or changes in the interpretation of international accounting standards, as well as other changes in legal regulations or their interpretation, can lead to increased expenses for the Issuer which can have an adverse effect on Oberbank Group's business, financial condition and results of operation. In particular, changes in tax law (e.g. the introduction of a financial transaction tax) can make potential investors less likely to invest in Oberbank's products, which can also have an adverse effect on Oberbank Group's business, financial condition and results of operation.

If the Issuer will be required to bear material amounts of additional expenses due to changes in legal regulations or changes in their interpretation, in particular with regard to labour, social, consumer protection, tax, pension law and accounting principles, this could materially negatively affect Oberbank's result and, accordingly, its ability to fulfil its obligations under the Notes.

The Issuer is subject to a number of strict and extensive regulatory rules and requirements compliance with which may cause significant costs and additional effort for the Issuer and any breach of such rules and requirements may result in major regulatory measures and bear a main legal and reputational risk.

As Austrian credit institution, the Issuer must comply with a number of regulatory rules and requirements at all times which continuously change and become more extensive and stricter.

- *EU Banking Package and Reform of the Banking Union*

  The Banking Union is a system for the supervision and resolution of credit institutions (like the Issuer) on EU level which is based on EU wide rules and currently consists of the Single Supervisory Mechanism and the Single Resolution Mechanism.

  On 7 June 2019, a legislative package for amendments of the following EU legal acts regarding the Banking Union ("**EU Banking Package**") was published in the Official Journal of the EU: (i) CRD IV; (ii) Regulation (EU) No 575/2013 (*Capital Requirements Regulation* – "**CRR**"); (iii) Directive 2014/59/EU (*Bank Recovery and Resolution Directive* – "**BRRD**"); and (iv) Regulation (EU) No 806/2014 (*Single Resolution Mechanism Regulation* – "**SRMR**").

  The EU Banking Package, inter alia, includes the following measures which are a specific and material risk to the Issuer: a net stable funding requirement; revised rules on capital requirements for counterparty credit risk and for exposures to central counterparties; a revised Pillar 2 framework; enhanced minimum requirement for own funds and eligible liabilities ("**MREL**") subordination rules for large banks referred to as top-tier banks; stricter conditions for liabilities that should constitute eligible liabilities instruments for MREL purposes; a new power for the resolution authority to impose moratoria; and restrictions to distributions in case of MREL breaches.

  The EU Banking Package entered into force on 27 June 2019. Certain amendments of the CRR apply already since 27 June 2019 or 28 December 2020, respectively, and those of the SRMR since 28 December 2020; further amendments of the CRR shall apply from 28 June 2021. The EU Member States shall implement the amendments of the BRRD and the CRD IV into national legislation by 28 December 2020. As of the date of this Prospectus, the amendments to the BRRD and CRD IV have not yet been implemented into national legislation in Austria.

- *Amended BCBS Standards*

  On 7 December 2017 and on 14 January 2019, the Basel Committee on Banking Supervision ("**BCBS**") published amended standards for its international regulatory framework for credit institutions developed by the BCBS. Within the EU, the revised

standards must be transposed into EU law for being applicable. These Basel III reforms, *inter alia*, include the following key measures which are a specific and material risk to the Issuer if transposed into EU law:

- a revised standardised approach for the calculation of credit risks;
- revisions to the credit valuation adjustment (CVA) framework;
- a revised standardised approach for operational risk;
- revisions to the measurement of the leverage ratio; and
- the finalized revised market risk framework.

The revised BCBS standards will (due to a deferral because of COVID-19) take effect from 1 January 2023 and will be phased in over five years.

On 7 December 2017, the BCBS also published a discussion paper on the regulatory treatment of sovereign exposures which would result in higher risk weights for certain sovereign exposures for the Issuer.

In addition, on 6 August 2020, the BCBS released consultative documents on the principles for operational risk and operational resilience.

Compliance with these regulatory rules and requirements, in particular including the ongoing monitoring and implementation of new or amended rules and regulations cause significant costs and additional effort for the Issuer and any (factual or even only alleged) breach of such rules and requirements, such as the EU Banking Package and the amended BCBS Standards, may result in significant regulatory measures and bear a main legal and reputational risk. Furthermore, stricter regulatory rules and requirements result in significant capital demand for the Issuer and/or result in constraints and limitations on risk related business and other business of the Issuer; the latter will negatively affect the income and revenues of the Issuer.

The Issuer must comply with its applicable regulatory capital requirements at any time.

The Issuer must comply with certain regulatory capital requirements (on an individual and consolidated basis) at any time:

- In this regard, the Issuer is required to satisfy the applicable minimum capital requirements pursuant to Article 92 CRR (so-called "Pillar 1 requirements") at all times. This includes a Common Equity Tier 1 ("**CET 1**") capital ratio of 4.5%, a Tier 1 capital ratio of 6% and a total capital ratio of 8%.

- In addition, the Issuer is required to satisfy at all times the capital requirements that are imposed by the FMA following the Supervisory Review and Evaluation Process ("**SREP**") (so-called "Pillar 2 requirements") ("**SREP add-on**") in form of CET 1 capital. As of the date of this Prospectus, the SREP add-on determined by the FMA for the Issuer on consolidated basis amounts to 1.3%. In addition, the Issuer is required to satisfy the so-called "Pillar 2 guidance".

- Furthermore, the Issuer must to satisfy at all times the combined buffer requirement within the meaning of § 2(45) of the Austrian Banking Act (*Bankwesengesetz* – "**BWG**") in form of CET 1 capital. For the Issuer, the combined buffer requirement consists of the sum of the capital buffer requirement for compliance with the capital conservation buffer of 2.5%, the countercyclical capital buffer for relevant credit exposures in Austria of currently 0.0% based on the total risk exposure calculated pursuant to Article 92(3) CRR. In addition, the following national countercyclical buffers determined by the designated authorities of other member States for significant credit exposures located in their territories currently apply to the Issuer: 0.5% in Czech Republic and 1.0% in Slovakia.

- Furthermore, the Issuer shall meet MREL in accordance with the Austrian Recovery and Resolution Act (*Sanierungs- und Abwicklungsgesetz* – "**BaSAG**") / the SRMR upon request of the resolution authority. This MREL target shall be determined by the resolution authority and shall be calculated as the amount of own funds and eligible liabilities expressed as a percentage of the total liabilities and own funds (TLOF) or as a percentage of total risk exposure amount (TREA) of the institution. As of the date of this Prospectus, the MREL target set for the Issuer (on consolidated level) amounts to 14.25% of TLOF at consolidated

level and 21.72% of TREA. The Issuer has to comply with this requirement as of 1 January 2022.

Stricter regulatory capital requirements applicable to the Issuer and/or any failure to comply with such requirements may result in (unscheduled) additional (quantitative or qualitative) capital demand for the Issuer and/or result in constraints and limitations on risk related business and other business of the Issuer; the latter would negatively affect the income and revenues of the Issuer.

The Issuer is obliged to contribute to the Single Resolution Fund and to the deposit guarantee fund and such obligation may result in additional financial burden for the Issuer and may have negative impact on its financial position and results of operation.

The Single Resolution Fund ("**SRF**") has been established by the SRMR and is composed of contributions by credit institutions (including the Issuer) and certain investment firms in the participating Member States of the Banking Union. The SRF shall be gradually built up during the initial period of eight years (2016 – 2023) and shall reach the target level of at least 1% of the amount of covered deposits of all credit institutions (including the Issuer) within the Banking Union by 31 December 2023.

The Issuer is a member of the Einlagensicherung AUSTRIA Ges.m.b.H. ("**ESA**"), the statutory (Austrian) deposit guarantee scheme within the meaning of the Austrian Deposit Guarantee and Investor Protection Act (*Einlagensicherungs- und Anlegerentschädigungsgesetz* – "**ESAEG**"). The ESAEG stipulates a target level of the *ex ante* financed deposit guarantee fund for the ESA of 0.8% of covered deposits which shall be fully composed by contributions of its members (including the Issuer) until 3 July 2024. If (in case of a crisis of a member institution) required, the Issuer may also be obliged to make certain (*ex post*) contributions to the SRF and the deposit guarantee fund.

The Issuer's obligation to make such contributions may result in additional financial burden for the Issuer and may have a negative impact on its financial position and results of operation.

If the relevant conditions are met, the resolution authority shall apply resolution actions in relation to the Issuer and such application could have severe negative consequences for the Holders up to and including a total loss of their investment.

The BRRD and the SRMR are the main legal basis for the recovery and resolution of credit institutions (including the Issuer) in the Banking Union.

If the conditions for resolution are met, the resolution authority shall take resolution actions (i.e. resolution tools and resolution powers) in relation to the Issuer in order to be able to exercise an orderly resolution, if the Issuer is failing (or likely to fail) and to preserve the financial stability.

The conditions for resolution of the Issuer are:

- the determination that the Issuer is failing or likely to fail has been made by the competent authority or the resolution authority; and
- having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments and in the future also of eligible liabilities taken in respect of the Issuer, would prevent the failure of the Issuer within a reasonable timeframe; and
- a resolution action is necessary in the public interest.

The resolution authority has so-called resolution powers, which it may exercise individually or in any combination in relation to or for the preparation of the application of a resolution tool in relation to the Issuer. The different resolution tools are: (i) the sale of business tool; (ii) the bridge institution tool; (ii) the asset separation tool; and (iv) the bail-in tool.

By applying the bail-in tool the resolution authority may write down eligible liabilities in a cascading contribution to loss absorption of the Issuer or convert them into instruments of ownership. Moreover, the resolution authority can separate the performing assets from the impaired or under-performing assets and transfer the shares in the Issuer or all or part of the assets of the Issuer to a private purchaser or a bridge institution without the consent of the shareholders.

1.3. RISK FACTORS REGARDING THE NOTES

Potential investors must base their decision to invest on their own assessment of the Issuer, as well as on the risks associated with the investment.

The contents of this Prospectus serve as general information and cannot take into account the personal situation of individual investors. The content of this Prospectus is not to be understood as legal, economic, or tax advice, and does not suffices to inform the investor as may be required by a securities service provider under the Austrian Securities Supervision Act 2018 (Wertpapieraufsichtsgesetz 2018 – "**WAG 2018**").

Each potential investor is therefore advised to consult an authorised financial advisor, tax advisor, or lawyer for economic, tax, and legal advice prior to investing in any Notes of the Issuer described in this Prospectus.

Each investment contains certain risks of a general nature. These risks include risks associated with the stock market, the bond market, the currency market, interest rates, market volatility, economic and political risk factors, credit risks, liquidity risks, and operational risk, alone or in combination with each other or in connection with other risk factors.

The Issuer considers the risks listed below to be the most significant risks associated with the Notes, whereby no claim to completeness is made.

1.3.1. Risks related to Notes generally

Set out below is a brief description of certain risks relating to the Notes generally:

Holders are exposed to the risk of partial or total inability of the Issuer to make interest and/or redemption payments under the Notes.

Holders are subject to the risk of a partial or total inability of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Notes. Any deterioration of the creditworthiness of the Issuer would increase the risk of loss (see also above "*Risk factors regarding the Oberbank Group's Business operation*"). A materialisation of the credit risk may result in partial or total inability of the Issuer to make interest and/or redemption payments.

Credit ratings of Notes (if any) may not adequately reflect all risks of the investment in such Notes, credit rating agencies could assign unsolicited credit ratings, and credit ratings may be suspended, downgraded or withdrawn, all of which could have an adverse effect on the market price and trading price of the Notes.

A credit rating of Notes (if any) may not adequately reflect all risks of the investment in such Notes. It is not a recommendation to buy, sell or hold securities and may be suspended, downgraded or withdrawn by the credit rating agency at any time. Furthermore, credit rating agencies could decide to assign credit ratings to the Notes on an unsolicited basis. Any such unsolicited credit rating, suspension, downgrading or withdrawal may have an adverse effect on the market price and trading price of the Notes.

The Notes are not covered by any (statutory or voluntary) protection scheme.

The Notes are not covered by the statutory protection scheme as provided pursuant to the ESAEG for certain deposits. In addition, no voluntary deposit guarantee scheme exists for Notes. In the event of the insolvency of the Issuer, investors of Notes therefore cannot rely on any (statutory or voluntary) protection scheme to compensate them for the loss of capital invested in the Notes and might lose their entire investment.

1.3.2. Risks related to the market generally

Set out below is a brief description of the principal market risks, including liquidity risk, exchange rate risk, interest rate risk and credit risk:

Holders are exposed to the risk of an unfavourable development of market prices of their Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes.

The development of market prices of the Notes depends on various factors, such as changes of market interest rate levels, the policies of central banks, overall economic developments, inflation rates or the lack of or excess demand for the relevant type of instrument. The Holder is therefore exposed to the risk of an unfavourable development of market prices of its Notes which materialises if the Holder sells the Notes prior to the final maturity of such Notes. Notes may be issued at a price

higher than the market price at issue and/or the redemption amount. This will increase the impact that unfavourable market price developments may have on the Notes. If the Holder decides to hold the Notes until final maturity, the Notes will be redeemed at the amount set out in the relevant Final Terms.

Holders assume the risk that the credit spread of the Issuer widens resulting in a decrease in the market price of the Notes.

A credit spread is the margin payable by the Issuer to the Holder of an instrument as a premium for the assumed credit risk. Credit spreads are offered and sold as premiums on current risk-free interest rates or as discounts on the price.

Factors influencing the credit spread include, among other things, the creditworthiness and credit rating of the Issuer, probability of default, recovery rate, remaining term to maturity of the Notes and obligations under any collateralisation or guarantee and declarations as to any preferred payment or subordination. The liquidity situation of the market, the general level of interest rates, overall economic developments, and the currency, in which the relevant obligation is denominated may also have a negative effect.

Holders are exposed to the risk that the credit spread of the Issuer widens resulting in a decrease in the market price of the Notes.

A liquid secondary market for the Notes may not develop or, if it does develop, that it will continue. In an illiquid market, a Holder may not be able to sell his Notes at fair market prices.

Application may be made to list Notes issued under the Programme to any of the Markets and Notes may be included in multilateral trading facilities (MTF). The Programme also provides for that Notes may not be listed or included at all.

Furthermore, in case of tap issues of Notes which are intended to be listed or included, such listing or inclusion would generally only be applied for upon the end of the subscription period which, as tap issues of Notes typically have a longer subscription period may lead to the fact that investors acquiring the Notes have to wait for a substantial period in time until they are able to dispose of their Notes in a market.

Regardless of whether the Notes are listed/included or not, a liquid secondary market for the Notes may not develop or, if it does develop, that it will continue. The fact that the Notes may be listed or included does not necessarily lead to greater liquidity as compared to unlisted/non-included Notes. If the Notes are not listed on any stock exchange or included in any multilateral trading facility, pricing information for such Notes may, however, be more difficult to obtain, which may adversely affect the liquidity of the Notes. In an illiquid market, a Holder might not be able to sell its Notes at any time at fair market prices or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Notes that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. Generally, these types of Notes would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a material adverse effect on the market price of Notes. The possibility to sell the Notes might additionally be restricted by country-specific reasons.

There is a risk that trading in the Notes or underlyings will be suspended, interrupted or terminated, which may have an adverse effect on the market price of such Notes.

If the Notes are listed on or included in trading (both "**listed**" or the "**listing**") in one or more of the Markets (which may be regulated or unregulated), the listing of such Notes may – depending on the rules applicable to such stock exchange - be suspended or interrupted by the respective stock exchange or a competent regulatory authority upon the occurrence of a number of reasons, including violation of price limits, breach of statutory provisions, occurrence of operational problems of the stock exchange or generally if deemed required in order to secure a functioning market or to safeguard the interests of Holders. Furthermore, trading in the Notes may be terminated, either upon decision of the stock exchange, a regulatory authority or upon application by the Issuer. Where trading in an underlying of the Notes is suspended, interrupted or terminated, trading in the respective Notes will usually also be suspended, interrupted or terminated and existing orders for the sale or purchase of such Notes will usually be cancelled. The Issuer has no influence on trading suspension or interruptions (other than where trading in the Notes is terminated upon the Issuer's decision) and that Holders in any event must bear the risks connected therewith. In particular, Holders may not be able to

sell their Notes where trading is suspended, interrupted or terminated, and the stock exchange quotations of such Notes may not adequately reflect the market price of such Notes. Furthermore, a trading suspension, interruption or termination of underlyings of the Notes may cause a suspension, interruption or termination of trading in the Notes and may as well result in an artificial or wrong valuation of the Notes. Finally, even if trading in Notes or underlyings is suspended, interrupted or terminated, such measures may neither be sufficient nor adequate nor in time to prevent price disruptions or to safeguard the Holders' interests; for example, where trading in Notes is suspended after price-sensitive information relating to such Notes has been published, the market price of such Notes may already have been adversely affected. All these risks would, if they materialise, have a material adverse effect on the Holders.

Exchange rate risks may occur, if a Holder's financial activities are denominated in a currency or currency unit other than the Specified Currency in which the Issuer will make principal and interest payments. Furthermore, government and monetary authorities may impose exchange controls that could adversely affect an applicable exchange rate.

The Issuer will pay principal and interest on the Notes in the Specified Currency. This presents certain risks relating to currency conversions if a Holder's financial activities are denominated principally in a currency or currency unit ("**Holder's Currency**") other than the Specified Currency. These include the risk that exchange rates may significantly change (including changes due to devaluation of the Specified Currency or revaluation of the Holder's Currency) and the risk that authorities with jurisdiction over the Holder's Currency may impose or modify exchange controls. An appreciation in the value of the Holder's Currency relative to the Specified Currency would decrease: (i) the Holder's Currency-equivalent yield on the Notes; (ii) the Holder's Currency-equivalent value of the principal payable on the Notes; and (iii) the Holder's Currency-equivalent market price of the Notes.

Government and monetary authorities may impose (as some have done in the past) exchange controls that could adversely affect an applicable exchange rate. As a result, Holders may receive less interest or principal than expected, or no interest or principal.

Incidental costs related in particular to the purchase and sale of the Notes may have a significant impact on the profit potential of the Notes.

When Notes are purchased or sold, several types of incidental costs (including transaction fees and commissions) may be incurred in addition to the purchase or sale price of the Notes. These incidental costs may significantly reduce or eliminate any profit from holding the Notes. Credit institutions may charge commissions which are either fixed minimum commissions or pro-rata commissions, depending on the order value. In addition to such costs directly related to the purchase of Notes (direct costs), investors must also take into account any follow-up costs (such as custody fees).

The purchase price applicable to the Notes on a given day will often include a bid-ask spread so that the purchase price will be higher than the price at which Holders are able to sell any such Notes on that given day.

The Issuer is exposed to conflicts of interest which might adversely affect the Holders.

The Issuer may from time to time act in other capacities with regard to the Notes, such as calculation agent, which allows the Issuer to make calculations in respect of the Notes (e.g. the amount of interest to be paid) which are binding for the Holders. This fact could generate conflicts of interest and may affect the market price of the Notes.

Employees of financial institutions such as Oberbank Group might undertake deals on their own behalf subject to securities laws on personal transactions and market abuse as well as statutory or internal compliance standards. Employees and connected parties are permitted to take part in securities offerings of Oberbank Group. Furthermore, when purchasing the Notes, the employee receives a discount from the fees.

Despite measures taken by the Issuer to ensure compliance with applicable laws and internal procedures, each of the above could create a conflict with the duties owed to the Holders.

1.3.3. Risks related to the structure of particular Notes

A wide range of Notes may be issued under the Prospectus. A number of these Notes may have features which contain particular risks for prospective investors. Set out below is a description of the most common features.

Holders of Notes with a fixed interest rate are exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate.

A holder of Notes with a fixed interest rate is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. While the nominal interest rate of Notes with a fixed interest rate as specified in the applicable Final Terms is fixed during the life of such Notes, the current interest rate on the capital market for issues of the same maturity (the "**market interest rate**") typically changes on a daily basis. As the market interest rate changes, the market price of Notes with a fixed interest rate also changes, but in the opposite direction. If the market interest rate increases, the market price of Notes with a fixed interest rate typically falls, until the yield of such Notes is approximately equal to the market interest rate. If the market interest rate falls, the market price of Notes with a fixed interest rate typically increases, until the yield of such Notes is approximately equal to the market interest rate. The same risk applies to Step-Up Notes and Step-Down Notes if the market interest rates in respect of comparable Notes are higher than the rates applicable to such Notes.

Holders of Notes with a floating interest rate may be exposed to the risk of fluctuating interest rate levels which make it impossible to determine the yield of such Notes in advance and are exposed to the risk of uncertain interest income.

Notes with a floating interest rate tend to be volatile investments. A holder of Notes with a floating interest rate is exposed to the risk of fluctuating interest rate levels and uncertain interest income. Fluctuating interest rate levels make it impossible to determine the profitability of Notes with a floating interest rate in advance. Neither the current nor the historical value of the relevant floating rate should be taken as an indication of the future development of such floating rate during the term of any Floating Rate Notes.

If Notes with a floating interest rate are structured to include caps or floors (which will be indicated in the respective Final Terms as "Minimum Rate of Interest" or "Maximum Rate of Interest") or a factor, or any combination of those features or other similar related features, the market price may be more volatile than those for Notes with a floating interest rate that do not include these features.

The regulation and reform of certain published rates, indices and other values or "benchmarks" may adversely affect the market price of such values or benchmark and correspondingly the return on any Notes linked to such values or benchmark.

The interest of Notes with a floating interest rate and Notes with a fix to floating interest rate will be calculated by reference to one or several specific benchmark indices (each a "**Benchmark**" and together, the "Benchmarks") (including the London Interbank Offered Rate ("**LIBOR**") and the Euro Interbank Offered Rate ("**EURIBOR**") or another Benchmark, each of which are provided by an administrator). Benchmarks are and/or will be the subject of ongoing national and international regulatory reform. Some of these reforms, such as the Benchmark Regulation, are already effective while others are still to be implemented. These reforms may cause an Original Reference Rate to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted.

The Benchmark Regulation could have a material impact on Notes linked to or referencing a Benchmark, in particular, including in any of the following circumstances:

- the administrator of the relevant Original Reference Rate could lose its authorisation as an administrator under the Benchmark Regulation and may not be able to obtain another form of registration under the Benchmark Regulation; or
- the methodology or other terms of the relevant Original Reference Rate could be changed in order to comply with the terms of the Benchmark Regulation, and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could impact the Notes, including calculation agent determination of the rate.

Any of the international, national or other proposals for reform or the general increased regulatory scrutiny of Benchmarks could increase the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with any such regulations or requirements. Such factors

may have the effect of discouraging market participants from continuing to administer or contribute to certain Benchmarks, trigger changes in the rules or methodologies used in certain Benchmarks or lead to the disappearance of certain Benchmarks, including EURIBOR and LIBOR. Benchmarks could also be discontinued entirely. If a Benchmark were to be discontinued or otherwise unavailable, the rate of interest for Notes with a floating interest rate or Notes with a fix to floating interest rate which are linked to such Benchmark will be determined for the relevant period by the fall-back provisions applicable to such Notes and as stipulated in the Terms and Conditions, which in the end could result in the same rate being applied until maturity of the Notes with a floating interest rate or a floating leg (in case of Notes with a fix to floating interest rate), effectively turning the floating rate of interest into a fixed rate of interest. Any such consequence could have a material adverse effect on the market price of and return on any such Notes.

Holders of Notes with (partly) inflation linked interest or of Zero Coupon Notes with inflation linked redemption on the Maturity Date bear the risk of the performance of the underlying index.

The relevant interest rate of Notes with inflation linked interest for an interest period or the redemption amount of Zero Coupon Notes with inflation linked redemption on the Maturity Date (whereby an issue of such zero coupon Notes is either made below par or at par and the redemption amount is at least 100 per cent. of the principal amount of such Zero Coupon Notes) are subject to the performance of the unrevised harmonised index of consumer prices of the Euro-Zone excluding Tobacco (HICP) (the "**Index**") which is calculated by the Statistical Office of the European Communities (Eurostat) (the "**Indexsponsor**") monthly. The Index is a figure that shows the changes in the prices of certain products contained in a sample product basket over time. The price of the Index is calculated on the basis of the prices of the products contained in this product basket. The composition and the calculation of the Index are determined by the Indexsponsor. The Issuer has no influence on the composition, calculation, weighting and performance of the Index.

The performance of the Index is subject to, *inter alia*, the product price risk and political and general economic risks which may impact the prices of the products contained in the product basket. No conclusions may be drawn for the future performance of the Index due to the current or historical price of the Index.

Holders of Notes with inflation linked interest bear in particular the risk that the interest rate fluctuates and thus, the amount of interest payment is uncertain or that no interest payments are made. Holders of Zero Coupon Notes with inflation linked redemption on the Maturity Date may bear the risk that in case of a negative performance of the Index they do not receive more than 100 per cent. of the principal amount of such Zero Coupon Notes as redemption amount. Furthermore, there is the risk for Holders of a negative performance of the Index components as well as a changed composition of the Index which may negatively impact the market price of Notes with inflation linked interest or of Zero Coupon Notes with inflation linked redemption on the Maturity Date.

Notes with fix to floating interest bear interest at a rate that converts from a fixed rate to a floating rate. A Holder bears the risk that after such conversion, the new interest rate may be lower than the then prevailing interest rates or the spread on the Notes with fix to floating interest may be less favourable than the then prevailing spreads on comparable floating rate notes relating to the same reference rate(s).

Notes with fix to floating interest bear interest at a rate that converts from a fixed rate to a floating rate. The conversion of the interest rate will affect the market price of the Notes. If the interest rate converts from a fixed rate to a floating rate, the spread on such Notes may be less favourable than then prevailing spreads on comparable floating rate notes relating to the same reference rate(s). In addition, the new floating rate may at any time be lower than the interest rates payable on other Notes. Furthermore, the risks set out above with regard to Notes with a fixed interest rate also apply in relation to the period for which a fixed rate of interest is being paid and the risks set out above with regard to Notes with a floating interest rate also apply in relation to the period for which a floating rate of interest is being paid.

A Holder of Zero Coupon Notes is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. Market prices of Zero Coupon Notes are more volatile than market prices of Notes with a fixed interest rate and are likely to respond to a greater degree to market interest rate changes than interest bearing Notes with a similar maturity.

Zero Coupon Notes do not pay current interest but are issued at a discount from their nominal value. Instead of periodical interest payments, the difference between the redemption price and the issue price constitutes interest income until maturity and reflects the market interest rate. A holder of Zero Coupon Notes is exposed to the risk that the market price of such Notes falls as a result of changes in the market interest rate. Market prices of Zero Coupon Notes are more volatile than market prices of Notes with a fixed interest rate and are likely to respond to a greater degree to market interest rate changes than interest bearing instruments with a similar maturity.

In the event that any Notes are redeemed prior to their maturity, a Holder of such Notes may be exposed to risks, including the risk that his investment will have a lower than expected yield (risk of early redemption).

The applicable Final Terms will indicate whether the Issuer may have the right to call the Notes prior to maturity (an optional call right) or whether the Notes will be subject to early redemption upon the occurrence of an event specified in the applicable Final Terms (an early redemption event). The Issuer will under certain circumstances have the right to early redeem the Notes if there is a change in the applicable tax and/or regulatory treatment of the Notes. If the Issuer redeems the Notes prior to maturity or the Notes are subject to early redemption due to an early redemption event, a Holder of such Notes is exposed to the risk that, due to early redemption, its investment will have a lower than expected yield. The Issuer might exercise its optional call right if the yield on comparable Notes in the capital markets falls, which means that the Holder may only be able to reinvest the redemption proceeds in Notes with a lower yield or with a similar yield of a higher risk.

Where the Terms and Conditions of the Notes provide for a right of early redemption by the Issuer only, Holders usually receive a higher yield on their Notes than they would if they were also granted a right to early redeem the Notes reflecting the higher risk of early redemption the Holders of such Notes are exposed to. Excluding the Holders' right to redeem Notes prior to their maturity is often a precondition for the Issuer being able to hedge its exposure under the Notes. Thus, without early redemption by Holders being excluded, the Issuer would not be able to issue Notes at all, or the Issuer would factor the potential hedging break costs into the redemption amount of the Notes, thus reducing the yield Holders receive from the Notes.

An Austrian court could appoint a trustee for the Notes to exercise the rights and represent the interests of Holders on their behalf in which case the ability of Holders to pursue their rights under the Notes individually may be limited.

Pursuant to the Austrian Trustee Act 1874 (*Kuratorengesetz 1874*) and the Austrian Trustee Supplemental Act 1877 (*Kuratorenergänzungsgesetz 1877*), a trustee (*Kurator*) could be appointed by an Austrian court upon the request of any interested party (e.g. a Holder) or upon the initiative of the competent court, for the purposes of representing the common interests of the Holders in matters concerning their collective rights. In particular, this may occur if insolvency proceedings are initiated against the Issuer, in connection with any amendments to the Terms and Conditions of the Notes or changes relating to the Issuer, or under other similar circumstances.

Even with respect to Notes where the applicable Terms and Conditions exclude the applicability of the Austrian Trustee Act and the Austrian Trustee Supplemental Act, an Austrian court might reject the exclusion of the applicability of the Austrian Trustee Act and the Austrian Trustee Supplemental Act and might appoint a trustee, because the Issuer is an Austrian company. If a trustee is appointed, it will exercise the collective rights and represent the interests of the Holders and will be entitled to make statements on their behalf which shall be binding on all Holders. Where a trustee represents the interests of and exercises the rights of Holders, this may conflict with or otherwise adversely affect the interests of individual or all Holders. The role of an appointed trustee may also conflict with provisions of the Terms and Conditions related to majority resolutions of the Holders pursuant to the Terms and Conditions. On the other hand, investors should not rely on the protection afforded by the Austrian Trustee Act and the Austrian Trustee Supplemental Act, as its application has been excluded in the Terms and Conditions and an Austrian court may give effect to such disapplication.

1.3.4. Specific Risks in connection with Ordinary Senior Notes

Holders of the Ordinary Senior Notes are exposed to the risk of statutory loss absorption.

The Single Resolution Mechanism shall provide the respective resolution authorities with uniform and effective resolution tools and resolution powers to achieve the resolution objectives.

The conditions for resolution are:

(a) the determination that the institution is failing or likely to fail has been made by the competent authority or the resolution authority; and

(b) having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, including measures by an institutional protection scheme, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments taken in respect of the institution, would prevent the failure of the institution within a reasonable timeframe; and

(c) a resolution action is necessary in the public interest.

The main resolution tool is the bail-in tool. When applying the bail-in tool, the resolution authority shall exercise the write-down and conversion powers in accordance with the following sequence (also called "loss absorbing cascade"): (i) CET 1 items; (ii) Additional Tier 1 ("**AT 1**") instruments; (iii) Tier 2 instruments; (iv) subordinated debt that is not AT 1 or Tier 2 capital; (v) unsecured claims resulting from debt instruments within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"); and (vi) the rest of bail-inable liabilities (such as the Ordinary Senior Notes) in accordance with the hierarchy of claims in bankruptcy proceedings, including the ranking provided for in § 131 BaSAG, to the extent required.

If the bail-in tool is applied to the Issuer, the principal amount of the Ordinary Senior Notes may be fully or partially written down or converted into instruments of ownership.

In case of an insolvency of the Issuer, deposits and certain other claims have a higher ranking than claims of the Holders the Ordinary Senior Notes.

According to § 131 BaSAG, in bankruptcy proceedings opened over the Issuer's assets, the following insolvency hierarchy applies to claims of deposits and senior unsecured creditors:

(a) claims of: (i) covered deposits; and (ii) deposit guarantee schemes subrogating to the rights and obligations of covered depositors in insolvency;

(b) claims of: (i) that part of eligible deposits from natural persons and micro, small and medium-sized enterprises which exceeds the covered deposits; and (ii) deposits that would be eligible deposits from natural persons and micro, small and medium-sized enterprises if they are not made through branches (located outside the EU) of institutions established within the EU; and

(c) claims of: ordinary unsecured creditors (such as any claims resulting from the Ordinary Senior Notes); and

(d) unsecured claims resulting from debt instruments (*unbesicherte Forderungen aus Schuldtiteln*) within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"), i.e. debt instruments that meet the following conditions: (i) the original contractual maturity of the debt instruments is of at least one year; (ii) the debt instruments contain no embedded derivatives and are not derivatives themselves; (iii) the relevant contractual documentation and, where applicable, the prospectus related to the issuance explicitly refer to the lower ranking under § 131(3) BaSAG.

Therefore, in case of bankruptcy proceedings and any comparable proceedings (such as resolution proceedings) opened in relation to the Issuer, claims resulting from the Ordinary Senior Notes are junior to the claims listed in points (a) and (b). For this reason, any payments on claims resulting from the Ordinary Senior Notes would only be made, if and to the extent any senior ranking claims have been fully satisfied.

1.3.5. Specific Risks in connection with Covered Bank Bonds

Claims of Holders under the Covered Bank Bonds which are not covered by the respective cover pool may be subject to write-down or conversion into instruments of ownership upon the occurrence of a certain trigger event (statutory loss absorption).

The Single Resolution Mechanism shall provide the respective resolution authorities with uniform and effective resolution tools and resolution powers to achieve the resolution objectives.

The conditions for resolution are:

(a) the determination that the institution is failing or likely to fail has been made by the competent authority or the resolution authority; and

(b) having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, including measures by an institutional protection scheme, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments taken in respect of the institution, would prevent the failure of the institution within a reasonable timeframe; and

(c) a resolution action is necessary in the public interest

The main resolution tool is the bail-in tool. When applying the bail-in tool, the resolution authority shall exercise the write-down and conversion powers in accordance with the following sequence (also called "loss absorbing cascade"): (i) CET 1 items; (ii) AT 1 instruments; (iii) Tier 2 instruments; (iv) subordinated debt that is not AT 1 or Tier 2 capital; (v) unsecured claims resulting from debt instruments within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"); and (vi) the rest of bail-inable liabilities (such as any liabilities under the Covered Bank Bonds which are not covered by the relevant cover pool) in accordance with the hierarchy of claims in bankruptcy proceedings, including the ranking provided for in § 131 BaSAG, to the extent required.

If the bail-in tool is applied to claims of Holders under the Covered Bank Bonds which are not covered by the respective cover pool, these claims may fully or partially written down or converted into instruments of ownership.

In case of an insolvency of the Issuer, deposits and certain other claims have a higher ranking than claims of the Holders under the Covered Bank Bonds which are not covered by the respective cover pool.

According to § 131 BaSAG, in bankruptcy proceedings opened over the Issuer's assets, the following insolvency hierarchy applies to claims of deposits and senior unsecured creditors:

(a) claims of: (i) covered deposits; and (ii) deposit guarantee schemes subrogating to the rights and obligations of covered depositors in insolvency;

(b) claims of: (i) that part of eligible deposits from natural persons and micro, small and medium-sized enterprises which exceeds the covered deposits; and (ii) deposits that would be eligible deposits from natural persons and micro, small and medium-sized enterprises if they are not made through branches (located outside the EU) of institutions established within the EU; and

(c) claims of: ordinary senior unsecured creditors (such as any claims of Holders under the Covered Bank Bonds which are not covered by the respective cover pool); and

(d) unsecured claims resulting from debt instruments (*unbesicherte Forderungen aus Schuldtiteln*) within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"), i.e. debt instruments that meet the following conditions: (i) the original contractual maturity of the debt instruments is of at least one year; (ii) the debt instruments contain no embedded derivatives and are not derivatives themselves; (iii) the relevant contractual documentation and, where applicable, the prospectus related to the issuance explicitly refer to the lower ranking under § 131(3) BaSAG.

If the respective cover pool is not sufficient to satisfy all claims of Holders under the Covered Bank Bonds, they may claim such amounts in case of bankruptcy proceedings opened over the assets of the Issuer, but only taking into the account the ranking of claims pursuant to § 131 BaSAG. Therefore, in case of bankruptcy proceedings opened over the assets of the Issuer, claims of Holders under the Covered Bank Bonds which are not covered by the respective cover pool would be junior to claims listed above in points (a) and (b).Therefore, they will only receive payment of such claims if and to the extent that their claims (which are senior to them) have been discharged in full. This insolvency

hierarchy is also relevant for the sequence of write-down and conversion where the Issuer is placed under resolution.

If the relevant Final Terms provide for an Extended Maturity Date Covered Bank Bonds may be redeemed after their Maturity Date.

The relevant Final Terms may provide that their term is extended to the Extended Maturity Date if the Issuer notifies the Holder that the Issuer cannot redeem the outstanding aggregate principal amount of the relevant Covered Bank Bonds on the Maturity Date. In such instance the payment of the outstanding aggregate principal amount shall be postponed and, notwithstanding the statutory regime on acceleration and liquidation of the respective asset cover pool, shall become due and payable on the Extended Maturity Date, together with accrued interest, if any, to, but excluding, the Extended Maturity Date. In such case, interest will continue to accrue on the outstanding aggregate principal amount of the Covered Bank Bonds during the period from, and including, the (original) Maturity Date to, but excluding, the Extended Maturity Date at the relevant rate of interest set out in the relevant Final Terms and will be payable by the Issuer on each Interest Payment Date from, and excluding, the (original) Maturity Date to, and including, the Extended Maturity Date (each as set out in the relevant Final Terms) in accordance with the relevant Terms and Conditions of the Covered Bank Bonds. Thus, Holders must not expect repayment of the outstanding aggregate principal amount on the (original) Maturity Date of the Covered Bank Bonds and are not entitled to terminate the Covered Bank Bonds if the term of the Covered Bank Bonds is extended. Furthermore, Holders may receive lower interest payments during such extended period as the relevant applicable rate of interest may be lower than the (respective) rate of interest which applied in the preceding interest periods.

The cover assets for the Covered Bank Bonds may not at all times be sufficient in order to cover the Issuer's obligations under the Covered Bank Bonds and/or replacement values may not be added in due time to the cover fund.

Covered Bank Bonds are secured or covered (*gedeckt*) by assets (*Vermögenswerte*) which meet the requirements set out in the Austrian Act on Covered Bank Bonds (*Gesetz betreffend fundierte Bankschuldverschreibungen* – "**FBSchVG**"). Payment claims of Holders of Covered Bank Bonds are collateralized through different (types of) cover pools (*Deckungsstöcke*) with different cover assets (*Vermögenswerte*).

In the event of insolvency or enforcement proceedings regarding the Issuer and/ or its assets, the relevant cover assets are separated from the Issuer's other assets and may not be used to satisfy claims of creditors of the Issuer other than the Holders of Covered Bank Bonds which are covered by these cover assets.

However, the cover assets of the relevant cover pool for Covered Bank Bonds may not at all times be sufficient in order to cover the obligations under the Covered Bank Bonds and/or replacement values may not be added in due time to the relevant cover pool. The relevant cover pools are managed separately and do not collateralize all Covered Bank Bonds, but only those, which are allocated to the relevant cover pool. Accordingly, investors cannot rely that the assets of the relevant cover pool, to which their Covered Bank Bonds are not allocated, may be used to satisfy their claims.

Risk that changes in the rating of the mortgage cover pool may adversely affect the market price of Covered Bank Bonds.

The rating of the mortgage cover pool for Covered Bank Bonds issued by an independent credit rating agency is an indicator of the value of the cover pool and, thus, of the Issuer's ability to meet its obligations under the Covered Bank Bonds. The lower the rating, the higher the credit rating agency estimates the risk that the Issuer may not fulfill its responsibilities. The credit rating agency can change or withdraw the credit rating at short notice. A change or withdrawal of the credit rating may adversely affect the market price of the Covered Bank Bonds with a mortgage cover pool.

1.3.6. Specific Risks in connection with Subordinated Notes

Holders of the Subordinated Notes are exposed to the risk of statutory loss absorption.

The Single Resolution Mechanism shall provide the respective resolution authorities with uniform and effective resolution tools and resolution powers to achieve the resolution objectives.

The conditions for resolution are:

(a) the determination that the institution is failing or likely to fail has been made by the competent authority or the resolution authority; and

(b) having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, including measures by an institutional protection scheme, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments taken in respect of the institution, would prevent the failure of the institution within a reasonable timeframe; and

(c) a resolution action is necessary in the public interest.

The main resolution tool is the bail-in tool. When applying the bail-in tool, the resolution authority shall exercise the write-down and conversion powers in accordance with the following sequence (also called "loss absorbing cascade"): (i) CET 1 items; (ii) AT 1 instruments; (iii) Tier 2 instruments (such as the Subordinated Notes); (iv) subordinated debt that is not AT 1 or Tier 2 capital; (v) unsecured claims resulting from debt instruments within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"); and (vi) the rest of bail-inable liabilities in accordance with the hierarchy of claims in bankruptcy proceedings, including the ranking provided for in § 131 BaSAG, to the extent required.

If the bail-in tool is applied to the Issuer, the principal amount of the Subordinated Notes may be fully or partially written down or converted into instruments of ownership.

In case of an insolvency of the Issuer, deposits and other certain claims as well as senior unsecured claims have a higher ranking than claims resulting from the Subordinated Notes.

According to § 131 BaSAG, in bankruptcy proceedings opened over the Issuer's assets, the following insolvency hierarchy applies to claims of deposits and senior unsecured creditors:

(a) claims of: (i) covered deposits; and (ii) deposit guarantee schemes subrogating to the rights and obligations of covered depositors in insolvency;

(b) claims of: (i) that part of eligible deposits from natural persons and micro, small and medium-sized enterprises which exceeds the covered deposits; and (ii) deposits that would be eligible deposits from natural persons and micro, small and medium-sized enterprises if they are not made through branches (located outside the EU) of institutions established within the EU;

(c) claims of ordinary senior unsecured creditors; and

(d) unsecured claims resulting from debt instruments (*unbesicherte Forderungen aus Schuldtiteln*) within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments"), i.e. debt instruments that meet the following conditions: (i) the original contractual maturity of the debt instruments is of at least one year; (ii) the debt instruments contain no embedded derivatives and are not derivatives themselves; (iii) the relevant contractual documentation and, where applicable, the prospectus related to the issuance explicitly refer to the lower ranking under § 131(3) BaSAG.

Further, according to Article 48(7) BRRD which has been newly introduced by the EU Banking Package, EU Member States shall ensure that all claims resulting from own funds items (such as the Subordinated Notes and to the extent the Subordinated Notes qualify as own funds items) have, in bankruptcy proceedings, a lower priority ranking than any claim that does not result from an own funds item. The EU Member States shall adopt the relevant national provisions by 28 December 2020 and apply them no later than 28 December 2020. As of the date of this Prospectus, the amendments to the BRRD have not yet been implemented into national legislation in Austria.

Consequently, upon entry into force of the respective Austrian provisions implementing this new provisions (which quite likely will also apply to existing instruments), the claims resulting from the Subordinated Notes will have a lower priority ranking than any claim resulting from an item which at the time of issuing the obligations under the Subordinated Notes is recognised as an own funds item, but which at the time of opening bankruptcy proceedings against the Issuer is no longer recognised as an own funds item.

Therefore, in case of bankruptcy proceedings opened over the assets of the Issuer, claims of the Holders of Subordinated Notes would be junior to claims listed above in points (a) to (d) as well as to claims under any other subordinated obligations of the Issuer which, in accordance with their terms or pursuant to mandatory provisions of law, rank or are expressed to rank senior to the obligations of the Issuer under the Subordinated Notes at the relevant time. The Holders of Subordinated Notes will only receive payment of their claims if and to the extent that such claims (which are senior to them) have been discharged in full.

The above stated insolvency hierarchy is also relevant for the sequence of write-down and conversion where the Issuer is placed under resolution.

Holders of the Subordinated Notes are exposed to the risk that the Issuer may issue further debt instruments or incur further liabilities.

There are no restrictions (contractual or otherwise) on the amount of (ordinary unsecured or subordinated) debt or other liabilities that the Issuer may (or may have to) issue, borrow and/or incur, ranking *pari passu* with or senior to the Subordinated Notes.

Any issue of such instruments and/or any incurring such liabilities may reduce the amount recoverable by Holders of the Subordinated Notes upon the Issuer's insolvency.

The Subordinated Notes do not give the right to accelerate future payments, and also may not be subject to set-off or any guarantee.

The Terms and Conditions of the Subordinated Notes do not provide for any events of default and Holders of the Subordinated Notes do not have the right to accelerate any future scheduled payment of interest (except in case of Zero Coupon Notes) or principal.

Furthermore, the Subordinated Notes are not subject to any set off or netting arrangements that would undermine their capacity to absorb losses in resolution and are neither secured nor subject to a guarantee or any other arrangement that enhances the seniority of the claims under the Subordinated Notes.

The Subordinated Notes may not be redeemed at the option of the Holders.

Holders of the Subordinated Notes will have no rights to call for the early redemption of their Subordinated Notes.

Therefore, Holders of the Subordinated Notes may be required to bear the financial risks of an investment in the Subordinated Notes until their final maturity.

The Subordinated Notes may be redeemed at any time for reasons of taxation or regulatory reasons.

The Issuer may at its sole discretion, early redeem the Subordinated Notes before their stated maturity (also before five years after the date of their issuance), at any time for reasons of taxation.

Similarly, the Issuer may at its sole discretion, early redeem the Subordinated Notes before their stated maturity (also before five years after the date of their issuance), at any time for regulatory reasons.

Therefore, it might occur that the Subordinated Notes are early redeemed and thus, investors will not be able to hold the Subordinated Notes until the stated maturity and accordingly, might not achieve the expected yield.

The rights of the Issuer to early redeem or repurchase the Subordinated Notes are subject to the prior permission of the Competent Authority.

The Issuer may, at its sole discretion, early redeem the Subordinated Notes at any time either for tax or regulatory reasons. In addition, if such right is foreseen in the Terms and Conditions of the Subordinated Notes, the Issuer may at its sole discretion redeem the Subordinated Notes before their stated maturity on a specified call redemption date. Such early redemption shall only be possible at least five years after the date of issuance of the first Tranche of the Series and provided that the conditions to redemption and repurchase are met.

Any early redemption and any repurchase of the Subordinated Notes are subject to the prior permission of the Competent Authority. Under the CRR, the Competent Authority may only permit institutions to early redeem or repurchase Tier 2 instruments such as the Subordinated Notes if certain conditions are met. These conditions, as well as a number of other technical rules and standards relating to regulatory capital requirements applicable to the Issuer, should be taken into account by the Competent Authority in its assessment of whether or not to permit any early redemption or repurchase. It is uncertain how the Competent Authority will apply these criteria in practice and such rules and standards may change during the term of the Subordinated Notes. It is therefore not possible to assess whether, and if so, on what terms, the Competent Authority will grant its prior permission for any early redemption or repurchase of the Subordinated Notes.

Furthermore, even if the Issuer would be granted the prior permission of the Competent Authority, any decision by the Issuer as to whether it will early redeem the Subordinated Notes will be made at the

sole discretion of the Issuer with regard to external factors (such as the economic and market impact of exercising an early redemption right, regulatory capital requirements and prevailing market conditions). The Issuer disclaims, and investors should therefore not expect, that the Issuer will exercise any early redemption right in relation to the Subordinated Notes. Holders of the Subordinated Notes therefore may be required to bear the financial risks of an investment in the Subordinated Notes until their final maturity.

Notwithstanding if the Issuer exercises an early redemption right in relation to Subordinated Notes with the prior permission of the Competent Authority Holders of Subordinated Notes are exposed to the risk that due to such early redemption their investments may have a different than expected yield and maturity.

1.3.7. Specific Risks in connection with Eligible Notes

Holders of the Eligible Notes are exposed to the risk of statutory loss absorption.

The Single Resolution Mechanism shall provide the respective resolution authorities with uniform and effective resolution tools and resolution powers to achieve the resolution objectives.

The conditions for resolution are:

(a) the determination that the institution is failing or likely to fail has been made by the competent authority or the resolution authority; and

(b) having regard to timing and other relevant circumstances, there is no reasonable prospect that any alternative private sector measures, including measures by an institutional protection scheme, or supervisory action, including early intervention measures or the write-down or conversion of relevant capital instruments taken in respect of the institution, would prevent the failure of the institution within a reasonable timeframe; and

(c) a resolution action is necessary in the public interest.

The main resolution tool is the bail-in tool. When applying the bail-in tool, the resolution authority shall exercise the write-down and conversion powers in accordance with the following sequence (also called "loss absorbing cascade"): (i) CET 1 items; (ii) AT 1 instruments; (iii) Tier 2 instruments; (iv) subordinated debt that is not AT 1 or Tier 2 capital; (v) unsecured claims resulting from debt instruments within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments", such as the Non-Preferred Senior Eligible Notes); and (vi) the rest of bail-inable liabilities (such as the Ordinary Senior Eligible Notes) in accordance with the hierarchy of claims in bankruptcy proceedings, including the ranking provided for in § 131 BaSAG, to the extent required.

Furthermore, where the Issuer meets the conditions for resolution and the resolution authority decides to apply a resolution tool to the Issuer, the resolution authority shall exercise the write down or conversion power in relation to relevant capital instruments (i.e. CET 1, AT 1 and Tier 2 instruments), and in the future in relation to certain eligible liabilities (such as the Non-Preferred Senior Eligible Notes) before applying any resolution tool (other than the bail-in tool).

If the power of write-down or conversion of relevant capital instruments and eligible liabilities or bail-in tool is applied to the Issuer, the principal amount of the Eligible Notes may be fully or partially written down or converted into instruments of ownership, although claims of other creditors of the Issuer might not be affected.

In case of an insolvency of the Issuer, deposits and certain other claims as well as potentially also senior unsecured claims have a higher ranking than claims resulting from the Eligible Notes.

According to § 131 BaSAG, in bankruptcy proceedings opened over the Issuer's assets, the following insolvency hierarchy applies to deposits and senior unsecured claims:

(a) claims of: (i) covered deposits; and (ii) deposit guarantee schemes subrogating to the rights and obligations of covered depositors in insolvency; and

(b) claims of: (i) that part of eligible deposits from natural persons and micro, small and medium-sized enterprises which exceeds the covered deposits; and (ii) deposits that would be eligible deposits from natural persons, micro, small and medium-sized enterprises if they are not made through branches (located outside the EU) of institutions established within the EU; and

(c) claims of: ordinary unsecured claims (such as any claims resulting from the Ordinary Senior Eligible Notes); and

(d) unsecured claims resulting from debt instruments (*unbesicherte Forderungen aus Schuldtiteln*) within the meaning of § 131(3) BaSAG (so-called "non-preferred senior debt instruments" such as the Non-Preferred Senior Eligible Notes), .i.e. debt instruments that meet the following conditions: (i) the original contractual maturity of the debt instruments is of at least one year; (ii) the debt instruments contain no embedded derivatives and are not derivatives themselves; (iii) the relevant contractual documentation and, where applicable, the prospectus related to the issuance explicitly refer to the lower ranking under § 131(3) BaSAG.

Therefore, in case of bankruptcy proceedings and any comparable proceedings (such as resolution proceedings) opened in relation to the Issuer, claims resulting from the Ordinary Senior Eligible Notes are junior to the claims listed in points (a) and (b) and claims resulting from the Non-Preferred Senior Eligible Notes are junior to the claims listed in points (a) to (c). For this reason, any payments on claims resulting from the Eligible Notes would only be made, if and to the extent any senior ranking claims have been fully satisfied.

Holders of the Non-Preferred Senior Eligible Notes are exposed to the risk that the Issuer may issue further (senior) debt instruments or incur further (senior) liabilities.

There are no restrictions (contractual or otherwise) on the amount of ordinary unsecured or subordinated debt or other liabilities that the Issuer may (or may have to) issue, borrow and/or incur, ranking senior to the Non-Preferred Senior Eligible Notes.

Any issue of such instruments and/or any incurring such liabilities may reduce the amount recoverable by Holders of the Non-Preferred Senior Eligible Notes upon the Issuer's insolvency.

Any rights of the Issuer to early redeem or repurchase the Eligible Notes are subject to the prior permission of the Resolution Authority.

The Issuer may, at its sole discretion, early redeem the Eligible Notes at any time either for reasons of taxation or regulatory reasons (in each case if such right is foreseen in the relevant Final Terms). In addition, if such right is foreseen in the relevant Final Terms, the Issuer may at its sole discretion redeem the Eligible Notes before their stated maturity on a specified call redemption date.

Any early redemption and any repurchase of the Eligible Notes is subject to the prior permission of the Resolution Authority. Under the CRR, the Resolution Authority may only permit institutions to early redeem or repurchase eligible liabilities instruments (such as the Eligible Notes) if certain conditions are met. These conditions, as well as a number of other technical rules and standards relating to regulatory capital requirements applicable to the Issuer, should be taken into account by the Resolution Authority in its assessment of whether or not to permit any early redemption or repurchase. It is uncertain how the Resolution Authority will apply these criteria in practice and such rules and standards may change during the maturity of the Eligible Notes. It is therefore not possible to assess whether, and if so, on what terms, the Resolution Authority will grant its prior permission for any early redemption or repurchase of the Eligible Notes.

Furthermore, even if the Issuer would be granted the prior permission of the Resolution Authority, any decision by the Issuer as to whether it will early redeem the Eligible Notes will be made at the sole discretion of the Issuer with regard to external factors (such as the economic and market impact of exercising an early redemption right, regulatory capital requirements and prevailing market conditions). There is the risk that the Issuer will not exercise any early redemption right in relation to the Eligible Notes, and the Holders therefore may stay invested until the maturity date of the Eligible Notes.

The Eligible Notes may be redeemed at the option of the a Holder (if at all) only subject to the prior permission of the Resolution Authority.

If such right is foreseen in the Final Terms, Holders of the Eligible Notes will have the right to call for the early redemption of their Eligible Notes, provided however, only subject to certain conditions, in particular the prior permission of the Resolution Authority.

Therefore, Holders of the Eligible Notes might not have an early redemption right and may be required to bear the financial risks of an investment in the Eligible Notes until their final maturity.

If such right is foreseen in the Final Terms, the Eligible Notes may be redeemed at any time for reasons of taxation and/or regulatory reasons.

If such right is foreseen in the Final Terms, the Issuer may at its sole discretion, early redeem the Eligible Notes before their stated maturity, at any time either for reasons of taxation.

Similar, the Issuer may at its sole discretion, early redeem the Eligible Notes before their stated maturity, at any time for regulatory reasons.

Therefore, potential investors should bear in mind that the Eligible Notes may be early redeemed and thus, investors will not be able to hold the Eligible Notes until the stated maturity and accordingly, might not achieve the expected yield.

The Eligible Notes do not give the right to accelerate future payments, and also may not be subject to set-off or any guarantee.

The Terms and Conditions of the Eligible Notes do not provide for any events of default and the Holders of the Eligible Notes do not have the right to accelerate any future scheduled payment of interest (except in case of Zero Coupon Notes) or principal.

Furthermore, claims of the Issuer are not permitted to be offset or netted against payment claims of the Holders under the Eligible Notes which are not, and may not become secured or subject to a guarantee or any other arrangement that enhances the seniority of the claims under the Eligible Notes.

1.3.8. Risk related to the use of proceeds

In respect of any Notes issued with a specific use of proceeds, such as a green bond, sustainable bond or social bond, such use of proceeds might not be suitable for the investment criteria of an investor.

The relevant Final Terms relating to any specific Tranche of Notes may provide that it will be the Issuer's intention to apply the proceeds from an offer of those Notes specifically for projects and activities that promote climate-friendly and other environmental purposes, sustainable or social purposes ("**ESG Projects**"). In particular the use of such proceeds for any ESG Projects might not satisfy, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental, sustainability or social impact of any projects or uses, the subject of or related to, any ESG Projects.

Furthermore, there is currently no clearly defined definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes, a "green" or "sustainable" or "social" or an equivalently-labelled project or as to what precise attributes are required for a particular project to be defined as "green" or "sustainable" or "social" or such other equivalent label nor such a clear definition or consensus might develop over time. Accordingly, any projects or uses the subject of, or related to, any ESG Projects might not meet any or all investor expectations regarding such "green", "sustainable" or "social" or other equivalently-labelled performance objectives or that any adverse environmental, social and/or other impacts will not occur during the implementation of any projects or uses the subject of, or related to, any ESG Projects. Also the criteria for what constitutes an ESG Project may be changed from time to time. In June 2020, the Council and the European Parliament passed Regulation (EU) 2020/852, as amended, which establishes the criteria for determining whether an economic activity qualifies as environmentally sustainable. In March 2020, the Technical Expert Group on Sustainable Finance ("**TEG**"), a group of experts established by the European Commission in 2018 to advise on the implementation of the EC action plan on financing sustainable growth, published its final report on EU taxonomy guidance on how companies and financial institutions can make disclosures using the taxonomy, including in relation to a future European standard for sustainable bonds as proposed by the same expert group in 2019. Furthermore, the TEG published on 9 March 2020 their usability guide for the EU Green Bond Standard. The European Commission is currently exploring the possibility of a legislative initiative for an EU Green Bond Standard and aims to take a decision by end of 2020 on how to take the EU Green Bond Standard forward.

The suitability or reliability for any purpose whatsoever of any opinion or certification of any third party (whether or not solicited by the Issuer) which may be made available in connection with the issue of any Notes and in particular with any ESG Projects to fulfil any environmental, sustainability, social

and/or other criteria remains uncertain. Any such opinion may not address risks that may affect the market price of Notes or any project.

In the event that any such Notes are listed or admitted to trading on any dedicated "green", "environmental", "sustainable" or "social" or other equivalently-labelled segment of any stock exchange or securities market (whether or not regulated), such listing or admission might not satisfy, whether in whole or in part, any present or future investor expectations or requirements as regards any investment criteria or guidelines with which such investor or its investments are required to comply, whether by any present or future applicable law or regulations or by its own by-laws or other governing rules or investment portfolio mandates, in particular with regard to any direct or indirect environmental, sustainability or social impact of any projects or uses, the subject of or related to, any ESG Projects. Furthermore, the criteria for any such listings or admission to trading may vary from one stock exchange or securities market to another. Any such listing or admission to trading might not be obtained in respect of any such Notes or, if obtained, that any such listing or admission to trading might not be maintained during the life of the Notes.

The relevant project(s) or use(s) the subject of, or related to, any ESG Projects might not be capable of being implemented in or substantially in such manner and/or accordance with any timing schedule and that accordingly such proceeds might not be totally or partially disbursed for such ESG Projects. Such ESG Projects might not be completed within any specified period or at all or with the results or outcome (whether or not related to the environment) as originally expected or anticipated by the Issuer. Any such event or failure by the Issuer will not constitute an event of default under the Notes. Also, any failure by the Issuer to provide any reporting or obtain any opinion will not constitute an event of default under the Notes.

Any such event or failure to apply the proceeds of any issue of Notes for any ESG Projects as aforesaid and/or withdrawal of any such opinion or certification or any such opinion or certification attesting that the Issuer is not complying in whole or in part with any matters for which such opinion or certification is opining or certifying on and/or any such Notes no longer being listed or admitted to trading on any stock exchange or securities market as aforesaid may have a material adverse effect on the market price of such Notes and also potentially the market price of any other Notes which are intended to finance ESG Projects and/or result in adverse consequences for certain investors with portfolio mandates to invest in securities to be used for a particular purpose.

2. GENERAL INFORMATION

(1) **Consents and Approvals.** The Issuer has obtained all necessary consents, approvals and authorizations in the Republic of Austria in connection with the establishment of the Programme. The establishment of the Programme has been authorized by the Issuer's supervisory board on 25 November 2020.

(2) **Representation of Holders.** In general, all rights attached to the Notes under the Programme must be asserted by the Holders or their representatives directly vis-á-vis the Issuer at its seat during usual business hours or in writing (registered letter is recommended) or before the competent courts. A representation of the Holders will not be organized by the Issuer.

To safeguard the rights of holders of, among others, bearer notes of Austrian issuers, if their rights are endangered due to a lack of common representation, in particular in case of insolvency of an issuer, the competent court has to appoint a trustee for the relevant Holders pursuant to the Austrian Trustee Act 1874 (*Kuratorengesetz 1874*) and the Austrian Trustee Supplemental Act 1877 (*Kuratorenergänzungsgesetz 1877*) certain acts of which require court approval and whose competences shall be specified by the court in regard of the common matters of the Holders.

In case of Covered Bank Bonds, the government commissioner has to apply by the competent court for the appointment of a trustee pursuant to § 2(3) FBSchVG in case he or she deems that the rights of the Holders of the Covered Bank Bonds are endangered. Such trustee must be appointed by the insolvency court in case of insolvency of the Issuer.

(3) **Categories of potential investors.** The Issuer may offer Notes to all types of investors, including eligible counterparties, professional clients and retail clients using all available distribution channels taking into account requirements to conduct an appropriateness test (if applicable) (all as more fully set out/described in MiFID II, the MiFID II Product Governance Rules and the UK MiFIR Product Governance Rules) in any jurisdiction where the legal and further requirements for offering securities are fulfilled. If offers are being made simultaneously in the markets of two or more countries, the Issuer generally does not reserve any tranches of Notes for certain of these.

(4) **Yield.** Yield means the general performance of a money or capital investment, calculated by the actual percentaged value increase of the invested capital. Yield is based on proceeds (coupon payments, dividends, realized capital gains) and the price increase of the money or capital investment.

Yield (as issuance yield – determined by issue price, interest rate, interest period and redemption payments) can only be specified in advance in the Final Terms under the assumption that the Notes are held until maturity and that the interest periods, interest rate and redemption payments are determined in advance.

For Notes other than Notes with a fixed interest rate, Step-up or Step-down Notes or Notes without periodic interest payments no yield can be calculated. Therefore, no yield will be stated in the Final Terms with respect to such Notes. The yield of such Notes is influenced substantially by the issue price, the interest periods, interest rate, any coupon payments during the life of the Notes, the development of the underlying and the redemption payment.

For Notes with a fixed interest rate, Step-up or Step-down Notes or Notes without periodic interest payments, the yield calculated on the basis of the issue price, interest rate (if any), interest period and the redemption payment will be specified in the Final Terms. The specified yield does not take into account any taxes or additional expenses like subscription fees or deposit fees.

The yield is calculated according to the internationally recognized method of the International Capital Market Association (ICMA). The yield is calculated by the issue price, interest rate, interest period and redemption payment of the relevant Notes as specified in the Final Terms. Thereby, the yield will be calculated by an approximation procedure with respect to the net present value, assuming that interest payments during the life of the Notes can be reinvested by the same yield.

(5) **Conflicting Interests.** Offers under the Programme will be made in the interest of Oberbank as Issuer. In case individual issuances under this Programme will be placed by financial

intermediaries or a bank syndicate (see the section "Consent to use the Prospectus"), such entities may receive a certain (placement) fee for their services. Other than that, the Issuer is not aware of any interests, including conflicting ones that are material to offers under the Programme.

(6) **Advisors, Audited Information, Expert Opinions.** Other than the information under the section "Documents Incorporated by Reference", this Prospectus does not contain any information which has been audited or reviewed by statutory auditors. This Prospectus does neither contain any information on advisors connected with an issue nor statements or reports attributed to persons as experts or other information sourced from third parties.

(7) **Restrictions on the free transferability of the securities**. The Terms and Conditions of the Notes do not contain any restrictions on the free transferability of the Notes. The Notes are freely transferable in accordance with applicable law and the applicable rules of the relevant clearing system.

(8) **Issue Price, Expenses and Taxes.** Notes may be issued at their nominal amount or at a discount or premium to their nominal amount. In case of a permanent (tap) issuance (*Daueremission*) the initial offering price will be continuously adapted to market conditions and published on the Issuer's website www. oberbank.at under the sections "Private Banking" / "Wertpapiere" / "Anleihen" under the item "Oberbank Neuemissionen". The Final Terms will specify the issue price relevant for each issuance. In addition to the issue price, investors may also be subject to certain expenses and taxes, which will also be specified in the Final Terms, if applicable.

(9) **Green Bonds, Sustainable Bonds and Social Bonds.** The Issuer will provide more details with regard to its prospective green bond, sustainable bond or social bond issues in its green bond framework, sustainable bond framework or social bond framework which will be disclosed (i) on the website "www .oberbank.at" once the frameworks are finalised and (ii) in the Final Terms under "Use of Proceeds". Such green bond framework, sustainable bond framework or social bond framework may be updated from time to time. The green bond framework, sustainable bond framework or social bond framework is not, nor shall be deemed to be, incorporated into and/or form part of this Prospectus.

Prior to issuances of green bonds, sustainable bonds or social bonds, the respective Issuer intends to mandate a recognised second party opinion provider which is a provider of environmental, social and governance (ESG) research and analysis. The second party opinion provider will evaluate the robustness and credibility of the respective Issuer's green bond framework, sustainable bond framework or social bond framework and intended use of proceeds in terms of its alignment with relevant industry standards. On such basis, the second party opinion provider typically reviews the respective Issuer's green bond framework, sustainable bond framework or social bond framework and provides its opinion thereon. For the avoidance of doubt, any such opinion or certification is not, nor shall be deemed to be, incorporated into and/or form part of this Prospectus. Any such opinion or certification is not, nor should be deemed to be, a recommendation by the Issuer or any other person to buy, sell or hold any such Notes. Any such opinion or certification is only current as of the date that opinion was initially issued. Prospective investors must determine for themselves the relevance of any such opinion or certification and/or the information contained therein and/or the provider of such opinion or certification for the purpose of any investment in such Notes. Currently, the providers of such opinions and certifications are not subject to any specific regulatory or other regime or oversight.

"**HICP**" or "**Index**" is the unrevised Harmonised Index of Consumer Prices (excluding Tobacco) for the Euro-Zone (as defined below), which is calculated on a monthly basis by the statistical office of the European Union (the "**EUROSTAT**" or the "**Index Sponsor**") and published on the Screen Page on the Determination Day (as defined below).

"**Screen Page**" means **[*insert relevant Screen Page*]** or the successor page displayed by the same information provider or any other information provider nominated by the Calculation Agent as the replacement information provider for the purposes of displaying the Index.

level published first shall, in any case, be applicable to the calculation.

Wird der Index nicht mehr vom Indexsponsor, sondern von einer anderen Person, Gesellschaft oder Institution, die die Berechnungsstelle für geeignet hält (der "**Nachfolgesponsor**") berechnet und veröffentlicht, so wird der anwendbare Zinssatz auf der Grundlage des vom Nachfolgesponsor berechneten und veröffentlichten Index berechnet. Jede hier enthaltene Bezugnahme auf den Indexsponsor gilt, sofern es der Zusammenhang erlaubt, als Bezugnahme auf den Nachfolgesponsor.

If the Index is not calculated and published by the Index Sponsor any more but by another person, corporation or institution, which the Calculation Agent considers suitable (the "**Successor Sponsor**"), the applicable Rate of Interest shall be calculated on the basis of the Index calculated and published by the Successor Sponsor. Any reference to Index Sponsor contained herein, shall, in this context, be deemed to refer to the Successor Sponsor.

Wird der Index zu irgendeiner Zeit aufgehoben und/oder durch einen anderen Index ersetzt, legt die Berechnungsstelle nach billigem Ermessen fest, welcher Index künftig für die Berechnung des anwendbaren Zinssatzes zugrunde zu legen ist (der "**Nachfolgeindex**"). Der Nachfolgeindex sowie der Zeitpunkt seiner erstmaligen Anwendung werden so bald wie möglich jedoch keinesfalls später als am Zinsenfestlegungstag bekannt gemacht. Jede hier enthaltene Bezugnahme auf den Index gilt, sofern es der Zusammenhang erlaubt, als Bezugnahme auf den Nachfolgeindex.

If at any time the Index is cancelled and/or replaced by any other index, the Calculation Agent shall, at its reasonable discretion, determine the Index which the following calculation of the applicable Rate of Interest will be based on (the "**Successor Index**"). The Successor Index and the time of its first application will be announced as soon as possible but not later than on the Determination Date. Any reference to the Index contained herein, shall, in this context, be deemed to refer to the Successor Index.

Ist nach Ansicht der Berechnungsstelle: (i) die Festlegung eines Nachfolgeindex aus welchen Gründen auch immer nicht möglich; oder (ii) nimmt der Indexsponsor eine wesentliche Veränderung hinsichtlich der Berechnungsmethode zur Bestimmung des Index vor oder verändert der Indexsponsor den Index auf irgendeine andere Weise wesentlich, wird die Berechnungsstelle die Weiterrechnung und Veröffentlichung des Indexstandes unter Berücksichtigung des Grundsatzes von Treu und Glauben und in wirtschaftlich vernünftiger Art und Weise durchführen.

If according to the Calculation Agent's opinion: (i) the determination of the Successor Index is, for whatever reason, not possible; or (ii) the Index Sponsor significantly changes the method of calculating the Index or the Index Sponsor significantly changes the Index in any other way, the Calculation Agent shall make further calculations and publications of the index level acting in good faith and in a commercially reasonable manner.

Die Berechnungsstelle wird den auf die Schuldverschreibungen zu zahlenden variablen Zinsbetrag in Bezug auf die festgelegte Stückelung für die relevante Variable Zinsperiode (der "**Variable Zinsbetrag**") berechnen. Der Variable Zinsbetrag wird berechnet, indem der Variable Zinssatz auf die festgelegte Stückelung angewendet wird, dieser Betrag mit dem Variablen Zinstagequotienten (wie nachstehend definiert) multipliziert und der hieraus resultierende Betrag auf die nächste Untereinheit der festgelegten Währung gerundet wird, wobei eine halbe Untereinheit aufgerundet wird oder die Rundung ansonsten gemäß der anwendbaren Marktkonvention erfolgt. Each Variable Amount of Interest so calculated may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without notice in the event of an extension or shortening of the Variable Interest Period.

Neue Mitgliedstaaten werden anhand einer Kettenindexformel in den Index integriert. Der Index wird monatlich ermittelt und in der Regel in der Mitte des Folgemonats veröffentlicht.

The unrevised harmonised index of consumer prices of the Euro-Zone excluding Tobacco is one of the EU index of consumer prices which are calculated pursuant to Council Regulation (EC) No 2494/95 of 23 October 1995 in accordance with a harmonized approach and standardised definitions. The base year is the year 2005. The Euro-Zone initially included Belgium, Germany, Ireland, Spain, France, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland. Greece is included in the Euro-Zone since January 2001, Slovenia since January 2007, Cyprus and Malta since January 2008, Slovakia since January 2009, Estonia since January 2011, Latvia since January 2014 and Lithuania since January 2015. The new member states are integrated into the Index using a chain index formula. The Index is calculated monthly and generally published halfway through the following month.

Amount shall be calculated on the basis of the Index calculated and published by the Successor Sponsor. Any reference to Index Sponsor contained herein, shall, in this context, be deemed to refer to the Successor Sponsor.

Wird der Index zu irgendeiner Zeit aufgehoben und/oder durch einen anderen Index ersetzt, legt die Berechnungsstelle nach billigem Ermessen, und auf eine wirtschaftlich vernünftige Weise handelnd, fest, welcher Index künftig für die Berechnung des anwendbaren Rückzahlungsbetrags zugrunde zu legen ist (der "**Nachfolgeindex**"). Der Nachfolgeindex sowie der Zeitpunkt seiner erstmaligen Anwendung werden so bald wie möglich, jedoch keinesfalls später als am Rückzahlungsfeststellungstag bekannt gemacht. Jede hier enthaltene Bezugnahme auf den Index gilt, sofern es der Zusammenhang erlaubt, als Bezugnahme auf den Nachfolgeindex.

If at any time the Index is cancelled and/or replaced by any other index, the Calculation Agent shall, in the reasonable discretion and acting in good faith and a commercially reasonable manner, determine the Index which the following calculation of the applicable Final Redemption Amount will be based on (the "**Successor Index**"). The Successor Index and the time of its first application will be announced as soon as possible but not later than on the Redemption Determination Date. Any reference to the Index contained herein, shall, in this context, be deemed to refer to the Successor Index.

Ist nach Ansicht der Berechnungsstelle: (i) die Festlegung eines Nachfolgeindex aus welchen Gründen auch immer nicht möglich; oder (ii) nimmt der Indexsponsor nach dem Tag der Auszahlung eine wesentliche Veränderung hinsichtlich der Berechnungsmethode zur Bestimmung des Index vor oder verändert der Indexsponsor den Index auf irgendeine andere Weise wesentlich, wird die Berechnungsstelle die Weiterrechnung und Veröffentlichung des Indexstandes unter Berücksichtigung des Grundsatzes von Treu und Glauben und in wirtschaftlich vernünftiger Art und Weise durchführen.

If according to the Calculation Agent's opinion: (i) the determination of the Successor Index is, for whatever reason, not possible; or (ii) the Index Sponsor significantly changes the method of calculating the Index or the Index Sponsor significantly changes the Index in any other way, the Calculation Agent shall make further calculations and publications of the index level acting in good faith and in a commercially reasonable manner.

"**HVPI**" oder "**Index**" ist der unrevidierte Harmonisierte Verbraucherpreisindex (ohne Tabak) für die Euro-Zone (wie nachstehend definiert), der monatlich vom Statistischen Amt der Europäischen Gemeinschaft (nachfolgend "**EUROSTAT**" oder "**Indexsponsor**" genannt) berechnet wird, und welcher auf der Bildschirmseite am Feststellungstag (wie nachstehend definiert) veröffentlicht wird.

"**HICP**" or "**Index**" is the unrevised Harmonised Index of Consumer Prices (excluding Tobacco) for the Euro-Zone (as defined below), which is calculated on a monthly basis by the statistical office of the European Union (the "**EUROSTAT**" or the "**Index Sponsor**") and published on the Screen Page on the Determination Day (as defined below).

"**Bildschirmseite**" bedeutet **[*relevante Bildschirmseite einfügen*]** oder die Nachfolgeseite, die von dem gleichen Informationsanbieter oder von einem anderen Informationsanbieter, der von der Berechnungsstelle als Ersatzinformationsanbieter für die Anzeige des Index benannt wird, angezeigt wird.

Im Fall einer Änderung eines veröffentlichten Indexstandes, der nach mehr als 24 Stunden nach der ersten Veröffentlichung erfolgt, soll in jedem Fall der zunächst ursprünglich veröffentlichte Indexstand zur Berechnung maßgeblich sein.

In case of any amendment of the published index level 24 hours after the first publication, the index level published first shall, in any case, be applicable to the calculation.

Wird der Index nicht mehr vom Indexsponsor, sondern von einer anderen Person, Gesellschaft oder Institution, die die Berechnungsstelle für geeignet hält (der "**Nachfolgesponsor**") berechnet und veröffentlicht, so wird der anwendbare Zinssatz auf der Grundlage des vom Nachfolgesponsor berechneten und veröffentlichten Index berechnet. Jede hier enthaltene Bezugnahme auf den Indexsponsor gilt, sofern es der Zusammenhang erlaubt, als Bezugnahme auf den Nachfolgesponsor.

If the Index is not calculated and published by the Index Sponsor any more but by another person, corporation or institution, which the Calculation Agent considers suitable (the "**Successor Sponsor**"), the applicable Rate of Interest shall be calculated on the basis of the Index calculated and published by the Successor Sponsor. Any reference to Index Sponsor contained herein, shall, in this context, be deemed to refer to the Successor Sponsor.

Wird der Index zu irgendeiner Zeit aufgehoben und/oder durch einen anderen Index ersetzt, legt die Berechnungsstelle nach billigem Ermessen fest, welcher Index künftig für die Berechnung des anwendbaren Zinssatzes zugrunde zu legen ist (der "**Nachfolgeindex**"). Der Nachfolgeindex sowie der Zeitpunkt seiner erstmaligen Anwendung werden so bald wie möglich jedoch keinesfalls später als am Zinsenfestlegungstag bekannt gemacht. Jede hier enthaltene Bezugnahme auf den Index gilt, sofern es der Zusammenhang erlaubt, als Bezugnahme auf den Nachfolgeindex.

If at any time the Index is cancelled and/or replaced by any other index, the Calculation Agent shall, at its reasonable discretion, determine the Index which the following calculation of the applicable Rate of Interest will be based on (the "**Successor Index**"). The Successor Index and the time of its first application will be announced as soon as possible but not later than on the Determination Date. Any reference to the Index contained herein, shall, in this context, be deemed to refer to the Successor Index.

Ist nach Ansicht der Berechnungsstelle: (i) die Festlegung eines Nachfolgeindex aus welchen Gründen auch immer nicht möglich; oder (ii) nimmt der Indexsponsor eine wesentliche Veränderung hinsichtlich der Berechnungsmethode zur Bestimmung des Index vor oder verändert der Indexsponsor den Index auf irgendeine andere Weise wesentlich, wird die Berechnungsstelle die Weiterrechnung und Veröffentlichung des Indexstandes unter Berücksichtigung des Grundsatzes von Treu und Glauben und in wirtschaftlich vernünftiger Art und Weise durchführen.

If according to the Calculation Agent's opinion: (i) the determination of the Successor Index is, for whatever reason, not possible; or (ii) the Index Sponsor significantly changes the method of calculating the Index or the Index Sponsor significantly changes the Index in any other way, the Calculation Agent shall make further calculations and publications of the index level acting in good faith and in a commercially reasonable manner.

Die Berechnungsstelle wird den auf die Schuldverschreibungen zu zahlenden variablen Zinsbetrag in Bezug auf die festgelegte Stückelung für die relevante Variable Zinsperiode (der "**Variable Zinsbetrag**") berechnen. Der Variable Zinsbetrag wird berechnet, indem der Variable Zinssatz auf die festgelegte Stückelung angewendet wird, dieser Betrag mit dem Variablen Zinstagequotienten (wie nachstehend definiert) multipliziert und der hieraus resultierende Betrag auf die nächste Untereinheit der festgelegten Währung gerundet wird, wobei eine halbe Untereinheit aufgerundet wird oder die Rundung ansonsten gemäß der anwendbaren Marktkonvention erfolgt. Im Falle einer Verlängerung oder Verkürzung der Variablen Zinsperiode kann der auf diese Weise berechnete Variable Zinsbetrag ohne Vorankündigung nachträglich angepasst (oder andere geeignete Anpassungsregelungen getroffen) werden.

The Calculation Agent will calculate the amount of interest payable under the Notes in respect of the Specified Denomination for the relevant Variable Interest Period (the "**Variable Amount of Interest**"). The Variable Amount of Interest shall be calculated by applying the Variable Rate of Interest to the Specified Denomination, multiplying such sum by the applicable Variable Day Count Fraction (as defined below) and rounding the resulting figure to the nearest sub-unit of the relevant Specified Currency, with half of such sub-unit being rounded upwards or otherwise in accordance with applicable market convention. Each Variable Amount of Interest so calculated may subsequently be amended (or appropriate alternative arrangements made by way of adjustment) without notice in the event of an extension or shortening of the Variable Interest Period.

Since 5 June 1998, the registered firm name has been "Oberbank AG". The Issuer does business also under the commercial name "Oberbank".

The legal entity identifier (LEI) is RRUN0TCQ1K2JDV7MXO75.

6.2. HISTORY

The foundation and the first few decades

At a meeting convened in Linz on 13 April 1869, the participants resolved to establish a "joint stock company in partnership with its consorts". The company to be established was to be designated "Bank für Ober-Oesterreich und Salzburg" and have its head office in Linz. The new bank was to be officially founded on 1 July 1869. The Federal Province of Upper Austria became a shareholder of Oberbank in 1920, followed by Bayerische Vereinsbank in 1921. In 1929, Creditanstalt für Handel und Gewerbe ("**CA**") became the majority owner of Oberbank.

Oberbank in the aftermath of World War II

In 1945 Oberbank, besides its Linz head office and the Salzburg principal branch, consisted of eleven branch offices. As early as 1946, the Austrian National Bank granted Oberbank a foreign currency trading licence; in 1949 the Bank was appointed ERP Bank under the Marshall Plan. Starting in 1955, a pronounced upward turn marked the Bank's development as it adopted the business model of a universal bank. The Bank gained personal banking customers, expanded its business by taking in deposits from private individuals and extending loans to this customer group, and thus laid the foundation for gaining an equally strong foothold in corporate and personal banking.

The 3 Banken Group

After World War II, Creditanstalt, which held majority stakes in the three regional banks Oberbank, Bank für Kärnten AG today BKS and BTV, divided its shares into three lots, retained one third of each lot itself and sold off a stake of one third in each of the banks to the respective other two regional banks. The originally capital-based links between Oberbank, BKS and BTV developed into a close, partnership-based cooperation that continues today, evidenced by a joint marketing approach under the banner of the 3 Banken Group. The three banks cooperate closely wherever there is synergy potential to be utilised, and their jointly held subsidiaries such as 3 Banken IT GmbH and 3 Banken-Generali Investment-Gesellschaft all boast a particularly successful track record. This cooperation in no way interferes with the three banks' market presences as autonomous banking institutions.

Listing on the Vienna Stock Exchange

By going public on 1 July 1986, Oberbank and its sister banks paved the way for the three banks to lastingly distance themselves from the influence of CA and continue with an independent strategy. Today, Oberbank's shareholder structure includes, besides its two sister banks, UniCredit Bank Austria, Wüstenrot, Generali and the Oberbank employees.

Oberbank today: "a regional bank at the heart of Europe"

The freedom of establishment of banks introduced in the 1970s allowed Oberbank to extend its catchment area beyond its original heartlands of Upper Austria and Salzburg. Oberbank has been represented with separate branches in Lower Austria since 1985, in Vienna since 1988, in Germany since 1990, in the Czech Republic since 2004, in Hungary since 2007 and in Slovakia since 2009.

6.3. SHARE CAPITAL

The Issuer's share capital amounts to EUR 105,921,900 and is divided into 35,307,300 common no par value bearer shares.

The Issuer's common no par value shares (ISIN AT0000625108) have been listed since 1986 on the Vienna Stock Exchange (*Amtlicher Handel*).

6.4. ARTICLES OF ASSOCIATION

The Issuer's objects are laid down in section 2 of its articles of association and read in particular as follows:

§ 2

(1) The object of the enterprise is the operation of banking and commercial transactions of all kinds both domestically and abroad as well as the management of real estate administrations. Subordinated capital may be issued.

(2) The company is also entitled to provide services in automatic data processing.

(3) For this purpose, the company shall be entitled to establish branches domestically and abroad and to participate in other enterprises.

6.5. BORROWING AND FUNDING STRUCTURE

There have been no material changes in the Issuer's borrowing and funding structure since the Issuer's last financial year.

6.6. EXPECTED FINANCING OF THE ISSUER'S ACTIVITIES

Oberbank's funding and liquidity profile reflects a business model that primarily focuses on retail and corporate customer business primarily in Austria and the neighbouring countries Germany, the Czech Republic, Hungary and Slovakia. Accordingly, Oberbank's main funding sources are customer deposits, debt securities in issue and funds from Oesterreichische Kontrollbank, Kreditanstalt für Wiederaufbau and LfA Förderbank Bayern and the use of targeted longer-term refinancing operations (TLTRO).

6.7. ORGANIZATIONAL STRUCTURE

Oberbank Group

As the parent company of the Oberbank Group, the Issuer has a multitude of direct and indirect holdings in companies with registered offices in Austria and abroad. A list of holdings indicating the type and amount of the Issuer's holdings as per 31 December 2019 can be found in Oberbank's Audited Consolidated Financial Statements 2019. The Issuer is not dependent upon any entities within the Oberbank Group.

3 Banken Group

The Issuer is part of the 3 Banken Group. 3 Banken Group is a group of independent regional banks which is composed of BKS Bank AG, Bank fuer Tirol und Vorarlberg Aktiengesellschaft (BTV) and Oberbank AG. This group does not constitute a group of companies (Konzern) pursuant to § 15 of the Austrian Stock Corporation Act (Aktiengesetz – "**AktG**") nor a credit institution group (Kreditinstitutsgruppe) pursuant to § 30 BWG nor a credit institution association (Kreditinstitute-Verbund) pursuant to § 30a BWG.

All three banks (BKS, BTV and Oberbank) operate independently in their core regions, which in the meantime extend beyond Austria's borders. The members of 3 Banken Group share the determination to maintain their independence, customer-proximity, market know how in the regions and the commitment of their employees.

The 3 Banken Group exploits the synergies created by the shared companies, such as the 3 Banken IT GmbH (IT), the 3 Banken Versicherungsmakler Gesellschaft m.b.H. (insurance), the 3-Banken-Generali Investment-Gesellschaft m.b.H. (investment funds), the 3-Banken Wohnbaubank AG and the Alpenländische Garantie-Gesellschaft m.b.H., which should safeguard their members against loan loss risks.

6.8. BUSINESS OVERVIEW

Principal activities

Oberbank is a regional bank with the business model of a universal bank. As a universal bank, the Issuer offers all the typical banking services of a full-service bank. The Issuer's purpose of business is the performance of banking transactions of all kinds and transactions related to them with the goal of offering customers comprehensive financial services. In the area of leasing, investment funds and insurance transactions, private equity financing as well as brokerage of building loan agreements (*Bausparverträge*) and provision of real-estate services, Oberbank utilizes its own subsidiaries or affiliates as well as the cooperation partners Generali Versicherung AG and Bausparkasse Wüstenrot AG.

The Issuer is licensed to perform all banking transactions pursuant to § 1 BWG with the exception of building loan transactions (*Bauspargeschäft*), investment transactions, real-estate investment fund transactions, participation fund transactions and the severance, retirement fund business and the exchange office business.

The Issuer structures its services and products in accordance with current statutory provisions and market conditions. For that reason there are constantly legally mandated and market adjustments in these areas.

Principal Markets

The Issuer’s catchment area is limited geographically because of its regional character. The allocation of business according to geographical features has therefore been omitted as this is of minor importance.

As at 31 December 2020, in addition to the (main office) head quarter in Linz, Oberbank had 176 branches in Upper Austria, Salzburg, Styria, Lower Austria, Burgenland, Vienna, Germany, the Czech Republic, Hungary and Slovakia. Of these, 97 are located in Austria, 42 in Germany, 20 in the Czech Republic, 13 in Hungary and 4 in Slovakia.

The federal states of Upper Austria and Salzburg are the Issuer's core markets. The other markets are the states of Lower Austria and Vienna, as well as Germany, the Czech Republic, Hungary and Slovakia. The market in Slovakia still plays a subordinated role with regard to business volume (deposits and loans) and contribution to earnings.

Trend Information

Trends affecting, the Issuer and the financial sector, in which the Issuer is operating, are the difficult overall macroeconomic environment, which is currently characterized by decreasing growth rates, and a historic low level of interest rates and the continued tense situation on the financial and capital markets. The exceptional low level of interest rates may have a permanent impact on the general investment and savings behavior. These factors can have in combination with the imminent technological changes in the financial sector as a result of the ongoing digitalisation or on their own a negative impact on the business, the financial condition and the results of operation.

Further regulatory changes or enforcement initiatives could affect the financial industry. New legal or regulatory requirements and changes in levels of adequate capitalisation, liquidity and leverage could lead to increased capital and liquidity requirements or standards. In addition, stricter jurisdictions and interpretations of the courts and administrative authorities may adversely affect the financial sector.

Furthermore, the Issuer has not become aware of any trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the Issuer's prospects at least in the current financial year.

Material Recent Events

Due to the events disclosed under "*6.11 Significant and Material Adverse Changes*" below, there have been recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.

Other than that, there are no recent events particular to the Issuer which are to a material extent relevant to the evaluation of the Issuer's solvency.

Profit forecasts or Estimates

The Issuer has decided not to include any profit forecasts or profit estimates in this Prospectus.

6.9. CREDIT RATINGS

On 5 May 2020 (issuer credit rating) and 3 April 2020 (mortgage cover pool rating), Standard & Poor's Global Ratings Europe Ltd. (Niederlassung Deutschland) ("**Standard & Poor's**") assigned the following credit ratings to the Issuer and its mortgage cover pool which are in force as of the date of this Prospectus:

	Credit Rating	Outlook
Long-term issuer credit rating	A	negative
Short-term issuer credit rating	A-1	-
Mortgage cover pool for Covered Bank Bonds	AAA	stable"

According to the credit ratings definitions as published by Standard & Poor's ("www .standardandpoors.com"), the above credit ratings have the following meanings:

'**AAA**' — An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

'**A**' — An obligor rated 'A' has strong capacity to meet its financial commitments but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligors in higher-rated categories.

'**A-1**' — An obligor rated 'A-1' has strong capacity to meet its financial commitments. It is rated in the highest category by Standard & Poor's.

Note: The credit ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major credit rating categories.

'**Outlook**' — A Standard & Poor's credit rating outlook assesses the potential direction of a long-term credit rating over the intermediate term (typically six months to two years). In determining a credit rating outlook, consideration is given to any changes in the economic and/or fundamental business conditions. An outlook is not necessarily a precursor of a credit rating change or future CreditWatch action. Positive means that a credit rating may be raised, negative means that a credit rating may be lowered and stable means that a credit rating is not likely to change.

More detailed information on the credit ratings can be retrieved on the Issuer's website ("www .oberbank.at"). General information regarding the meaning of the credit rating and the qualifications which have to be observed in connection therewith can be found on the website of Standard & Poor's ("www .standardandpoors.com").

Standard & Poor's has its registered office at Bockenheimer Landstraße 2, 60306 Frankfurt am Main in Germany and is registered under the Regulation (EU) No 462/2013 as amended (the "**CRA Regulation**") as registered credit rating agency. ESMA publishes on its website ("www .esma.europa.eu") a list of credit rating agencies registered in accordance with the CRA Regulation. That list shall be updated within five working days following the adoption of a decision under Articles 16, 17 or 20 of the CRA Regulation. The European Commission publishes that updated list in the Official Journal of the European Union within 30 days following the updates.

Other than that, any of the Issuer's securities have not been rated. The Final Terms will specify if credit ratings are assigned to individual issuances of Notes at the request or with the cooperation of the Issuer in the rating process.

6.10. FINANCIAL INFORMATION

Historical Financial Information

The most recently audited financial information is dated 31 December 2019.

The Issuer’s Audited Consolidated Financial Statements 2019 and 2018 have been prepared in accordance with the International Financial Reporting Standards (IFRS) and the statutory banking and corporate provisions to be applied pursuant to § 59a BWG. Both were given an unqualified audit opinion and can be viewed on the Issuer’s website (www .oberbank.at) under the section "Oberbank AG" / "Investor Relations" / "Kennzahlen und Berichte" under the item "Geschäftsbericht / Oberbank Annual Report".

Other than the mentioned Audited Consolidated Financial Statements 2019 and 2018, no other information contained in this Prospectus has been audited by auditors. Where financial data in this Prospectus has not been extracted from the Issuer’s Audited Consolidated Financial Statements 2019, this has been stated in this Prospectus at the relevant information.

The Issuer’s Audited Consolidated Financial Statements 2019 and 2018 are incorporated by reference into this Prospectus (see the section "Documents Incorporated by Reference").

Interim Financial Information

The Issuer has published Unaudited Interim Financial Statements as of 30 September 2020, which are not audited and were not reviewed by an auditor and are incorporated by reference into this Prospectus (see the section "Documents Incorporated by Reference").

6.11. SIGNIFICANT AND MATERIAL ADVERSE CHANGES

The COVID-19 pandemic and the consequences for the economy affected the Oberbank Group's financial performance and position, including the devaluation of one of the Issuers most important investments (i.e. its participation in voestalpine AG) and further write-downs of financial assets. Due to these circumstances the earnings of the Issuer declined in the first three quarters of 2020. Furthermore, Oberbank expects reduced dividend payments from its participations (whose corona-related distributions cannot be clearly quantified) as well as a possible corona-related increase in loan defaults in the near future.

Compared to the beginning of the year 2020, the amount of the valuation allowance formed in the life business increases by approximately EUR 13.7 million[40], whereby the effect from the adjustment of the probability of default due to the changed economic outlook amounts to EUR 6.9 million and the effect from the allocation from the most affected economic sectors by means of collective staging amounts to EUR 6.7 million.

Other than that, there has been no significant change in the financial position and in the financial performance of the Oberbank Group since 30 September 2020 and no material adverse change in the prospects of the Issuer since 31 December 2019.

[40] The value given is a rounded up figure, which results from the summation of the individual amounts given, which are also rounded up.

7.4. POTENTIAL CONFLICTS OF INTEREST

For all members of the Issuer's management board it applies in general that their activities outside the Issuer could in individual cases result in potential conflicts of interest, with regard to the Issuer's banking activities, if the Issuer has an active business relationship with the relevant companies. The Issuer is currently not aware of any such conflicts of interest.

Already in 2006, the Issuer's supervisory board defined guidelines for determining their autonomy in terms of the Austrian Corporate Code of Governance, which may be viewed under www .oberbank.at.

All members of the Issuer's supervisory board have declared themselves to be independent in an individual statement.

7.5. AUDIT AND AUDITORS' REPORTS

The Audited Consolidated Financial Statements 2019 and 2018 of Oberbank were audited by KPMG Austria GmbH Wirtschaftsprüfungs- und Steuerberatungsgesellschaft, 4020 Linz, Kudlichstrasse 41 – 43, signed by Mag. Martha Kloibmüller, certified auditor and tax consultant, and were issued with an unqualified auditors' opinion.

KPMG Austria GmbH Wirtschaftsprüfungs- und Steuerberatungsgesellschaft is a member of the Austrian Chamber of Professional Accountants and Tax Advisors.

No auditors have been removed, reappointed or have resigned during the period covered by the historical financial information.

7.6. PRINCIPAL SHAREHOLDER

Shareholder structure as at 31 December 2020:

	Shares in total capital (Common Share)
Free float	31.57%
CABO Beteiligungsgesellschaft m.b.H., Vienna	23.76%
Bank für Tirol und Vorarlberg Aktiengesellschaft, Innsbruck (including BTV 2000 Beteiligungsverwaltungsgesellschaft m.b.H.)	16.15%
BKS Bank AG, Klagenfurt (including Sub-Syndicate with BVG*)	14.79%
Wüstenrot Wohnungswirtschaft reg. Ges.m.b.H., Salzburg	4.50%
Employee participation	4.20%
Uni Credit Bank Austria AG, Vienna	3,41%
Generali 3 Banken Holding AG, Vienna	1.62%
* Beteiligungsverwaltung Gesellschaft m.b.H ("BVG") holds 0.58% of Oberbank.	

(Source: Issuer's own calculations)

There have been no significant changes to the Issuer's shareholder structure since 31 December 2020.

The independence of Oberbank is primarily based on its shareholder structure. No single shareholder is capable of controlling the Issuer either directly or indirectly. The largest individual shareholder of Oberbank is CABO Beteiligungsgesellschaft m.b.H., a 100% subsidiary of UniCredit Bank Austria AG.

Another important element of the stable shareholder structure is the employee participation in the Issuer. As part of an employee share participation scheme, the employees took advantage of the opportunity to buy common shares in 2020. In addition, Oberbank made use of the legal possibility of allocating shares to employees free of charge and tax-privileged via an employee participation foundation. The free float in Oberbank is held by both corporate companies and private shareholders.

BKS Bank AG (inclusive Beteiligungsverwaltung Gesellschaft m.b.H.) holds a stake of 14.79% of the share capital of the Issuer. Bank für Tirol und Vorarlberg Aktiengesellschaft (inclusive BTV 2000 Beteiligungsverwaltunggesellschaft m.b.H) holds a stake of 16.15% in the share capital of the Issuer. Wüstenrot Wohnungswirtschaft reg.Gen.mb.H. holds a stake of 4.50% of the share capital of the Issuer. These three core shareholders have concluded a syndicate agreement and hold together with Beteiligungsverwaltung Gesellschaft m.b.H. 35.44% of the common shares in the Issuer. The shareholder Beteiligungsverwaltung Gesellschaft m.b.H. has committed itself by a subordination syndicate agreement effective 7 November 2020, to exercise its voting rights representing 0.58 % of the share capital of the Issuer at the General Meeting of Oberbank only according to the voting instructions of BKS Bank AG. Stock syndication strengthens the Issuer's autonomy and bundles the

interests of the syndicated partners with regard to cooperation and sales partnerships. The syndication agreement essentially includes provisions concerning the joint exercising of voting rights in the Issuer's shareholders' meeting as well as mutual pre-emption rights of the syndicate partners. Beyond said syndication agreements the Issuer is also not aware of any agreements that, if exercised at a later date, could lead to a change in control of the Issuer. Measures for preventing the abuse of control are not necessary in the view of the Issuer's management. Shareholders' rights may be exercised pursuant to Austrian company law and in particular pursuant to the AktG.

8. LEGAL PROCEEDINGS

Safe for the below, the Issuer is not aware of any governmental, legal, or arbitration proceedings (including any such proceedings which are pending or threatened of which the Issuer is aware) during the previous 12 months which may have, or have had in the recent past, significant effects on the Issuer and/or Group's financial position or profitability.

Actions brought by UniCredit and CABO against Oberbank, BKS and BTV

UCBA and its wholly owned subsidiary CABO, as direct and indirect minority shareholders of BKS, have applied for a special audit for the Annual General Meeting of BKS and for a special audit for the Annual General Meeting of BTV. The motions call for a review of the lawfulness of BKS' capital increases since 1994 and BTV's capital increases since 1993. The special audits are intended to clarify whether, due to the reciprocal shareholdings of BKS, BTV and Oberbank (together, the "**3 Banken Group**"), reciprocal participation in the respective capital increases had been permissible in the past and complied with the requirement of real capital raising.

At BKS' Annual General Meeting on 8 May 2019, the application for a special audit was rejected by the majority of the shareholders. On 6 June 2019, UCBA and CABO filed a lawsuit against BKS to contest resolutions of the Annual General Meeting pursuant to Sections 195 et seq. AktG. The actions contest the discharge of the members of the management board and the discharge of individual members of the supervisory board as well as the refusal to carry out a special audit.

At the Annual General Meeting of BTV on 16 May 2019, the application for a special audit was rejected by a majority of shareholders. On 6 June 2019, UCBA and CABO filed a lawsuit against BTV to contest resolutions of the Annual General Meeting pursuant to Sections 195 et seq. AktG. The actions contest the discharge of the members of the management board and the discharge of individual members of the supervisory board as well as the refusal to carry out a special audit.

In support of their claim, UCBA and CABO asserted that the syndicate of the core shareholders of BTV, consisting of BKS, Oberbank, Generali 3Banken Holding AG ("**G3B**") and Wüstenrot Wohnungswirtschaft reg. Gen. m.b.H., had in the past violated the takeover bid offer obligation. In summary, according to the claimants, the reason lies in the fact that OBK-Mitarbeiterbildungs- und Erholungsförderung reg. Gen. m.b.H. as a shareholder of G3B is not independent of the shareholder Oberbank. With its decision of 9 January 2020, the regional court Innsbruck (*Landesgericht Innsbruck*) interrupted the proceedings to obtain a declaratory decision of the Austrian Takeover Commission (*Übernahmekommission*) pursuant to Section 29 (2) of the Austrian Takeover Act.

In addition to their law suit for annulment of the resolutions on the rejection of the submitted special audit requests, UCBA and CABO filed requests with the regional courts in Klagenfurt and Innsbruck (*Landesgericht Klagenfurt and Landesgericht Innsbruck*) that the courts shall appoint a special auditor for BKS and for BTV for the rejected special audit requests. These requests were rejected by the regional courts. The competent courts of appeal dismissed the appeals of UCBA and CABO. Since the Supreme Court (*Oberster Gerichtshof*) also rejected the appeals of UCBA and CABO, these decisions meanwhile have become final and binding.

UCBA and CABO filed an action for rescission against Oberbank AG on 6 June 2019. The action seeks the annulment of the resolution adopted at the Annual General Meeting on 14 May 2019 under item 5.1 of the agenda to reduce the number of members of the supervisory board by one member from twelve to eleven (not including the members delegated pursuant to Section 110 of the Labour Constitution Act (*Arbeitsverfassungsgesetz*, "**ArbVG**") and furthermore it seeks the judicial declaration that the Annual General Meeting has adopted the resolution that Dr. Jürgen Kullnigg who is currently member of the managing board of UCBA will be declared elected as a member of the Supervisory Board for the third position (last position) for the maximum duration according to the stipulations in the Articles of Association in accordance with Section 87 (4) AktG. On 24 September 2020, the Higher Regional Court Linz (*Oberlandesgericht Linz*) decided that the reduction of the number of members of the supervisory board was not justified but nonetheless that Dr. Jürgen Kullnigg (UCBA) was not elected as a member of the supervisory board. Only the latter part of the decision became legally binding, the first part – the reduction – has been transferred to the Supreme Court (*Oberster Gerichtshof*).

On 4 February 2020, an Extraordinary General Meeting of Oberbank was held at the request of UCBA and CABO, at which was requested to initiate a special audit in line with Section 130 AktG and to

terminate the arbitration proceedings between Oberbank and G3B (see below). Both motions were rejected by a majority of shareholders.

On 25 February 2020, UCBA and CABO submitted an application for review to the Austrian Takeover Comission (*Übernahmekomission*). On 2 March 2020 the Austrian Takeover Commission (Übernahmekommission) initiated the review proceedings pursuant to Section 33 of the Austrian Takeover Act regarding the Issuer, BKS and BTV. The subject of the review proceedings is the preliminary question regarding the ongoing proceedings as to whether there has been a violation of the obligation to make an offer, in particular pursuant to Section 22a(3) or Section 22(4) of the Austrian Takeover Act. Given the links between the members of the 3 Banken Group, a breach of the offer obligation by one of the three banks may also have an impact on the other two banks. If a breach of the obligation to make an offer is established, the voting rights of the aforementioned entities arising from the shares in the Issuer or the voting rights of the Issuer in the shares of the two other banks are suspended until a mandatory offer in accordance with the Takeover Act is made for the acquisition of all the shares in the Issuer from the aforementioned entities or the Issuer, or the suspension of voting rights is lifted by the Takeover Commission. On 28 September 2020, 29 September 2020 and 1 October 2020, a trial before the Takeover Commission took place. The hearing was closed on 1 October 2020. The decision of the Takeover Commission is still pending.

On 3 March 2020, UCBA and CABO challenged all shareholder resolutions which were rejected (i.e. the requests to initiate a special audit of all capital increases since 1989 and to terminate the arbitration proceedings between Oberbank and G3B) and adopted (i.e. the resolution to reduce the number of capital representatives of the Supervisory Board of Oberbank from 11 to 10, as recommended by the Austrian Corporate Governance Code) at the Extraordinary General Meeting of Oberbank by the shareholders at the regional court Linz (*Landesgericht Linz*).

With its decision of 29 May 2020, the regional court Linz (*Landesgericht Linz*) interrupted the proceedings in order to obtain a declaratory decision of the Austrian Takeover Commission (Übernahmekommission) on takeover-relevant preliminary questions raised by UCBA and CABO pursuant to Section 29 (2) of the Austrian Takeover Act. Since the decision of the Takeover Commission is still pending, the interruption is still in force.

At the Annual General Meetings 2020 of Oberbank (20 May 2020), BKS (29 May 2020) and BTV (10 June 2020), UCBA and CABO again filed several special audit requests, which were all rejected by the majority of the shareholders. Subsequently, UCBA and CABO again filed actions for annulment against Oberbank (7 July 2020), BKS (13 July 2020) and BTV (13 July 2020), in particular against the discharge resolutions and the rejection of the submitted special audit requests. The regional courts Linz and Klagenfurt (*Landesgericht Linz und Landesgericht Klagenfurt*) interrupted the proceedings to obtain a declaratory decision of the Austrian Takeover Commission (*Übernahmekommission*) on takeover-relevant preliminary questions raised by UCBA and CABO pursuant to Section 29 (2) of the Austrian Takeover Act. Since the decision of the Takeover Commission is still pending, the interruptions are still in force.

After the requests for a special audit at the Extraordinary General Meeting of the Issuer on 4 February 2020 and the Ordinary General Meeting of the Issuer on 20 May 2020 were rejected, UCBA and CABO filed an application for the appointment of a special auditor for Oberbank pursuant to Section 130 (2) AktG by a court. The regional court of Linz (*Landesgericht Linz*) rejected this request in one part and interrupted the proceedings in the other part until a decision on the action of UCBA and CABO for annulment of the resolutions, made in the Annual General Meeting of 20 May 2020 (see above), has become final and binding. Since UCBA and CABO may file an appeal, this decision has not yet become final and binding.

In view of the links between the members of the 3 Banken Group, a success of any special audit of one of the three institutions would also have an impact on the other two institutions.

In the Issuer's view, the arguments put forward by UCBA and CABO are without legal substance. The reciprocal stakes held by the members of the 3 Banken Group have, for 35 years now, been among the frequently reviewed and analysed ownership and shareholder structures in Austria. Over the course of many years, legal experts have examined them and confirmed that they do not give rise to any objections. The most recent such analysis was carried out within the scope of Basel III implementation.

However, it cannot be excluded that UCBA and/or CABO will succeed with any such motions for special audits for annual general meetings of members of the 3 Banken Group and/or possibly

following similar proceedings any of which could have significant effects on the Issuer and/or Group's financial position or profitability.

Arbitration proceedings between the Issuer and G3B

Since 23 July 2019, an arbitration proceeding was in progress between the Issuer and G3B in order to clarify whether the deposits made by G3B to the Oberbank in April 2019 were indeed necessary to settle any potential outstanding capital contributions of G3B or can be reclaimed. The proceeding resulted in the arbitral award of 22 February 2020 which confirmed that there were no outstanding capital contributions of G3B so that G3B is entitled to reclaim the payments made in April 2019. Upon the Supreme Court's (*Oberster Gerichtshof*) confirmation of the correctness of this arbitral award, it was duly fulfilled by the Issuer.

9. MATERIAL CONTRACTS

According to estimates by the Issuer's management board, the Issuer has concluded the following agreements that are material to its business activities:

The ALPENLÄNDISCHE GARANTIE-GESELLSCHAFT m.b.H., Linz, ("**ALGAR**") was founded as a credit institution in 1983 and is a joint subsidiary of the 3-Bank Group. The purpose of business of ALGAR is non-profit oriented and serves to secure large credit exposures of the three shareholder banks by assuming guarantees, suretyships and other liabilities for credits and loans. The Issuer holds 50% of the nominal capital, which is EUR 8,000,000.00, and Bank für Tirol und Vorarlberg Aktiengesellschaft, Innsbruck and BKS Bank AG each hold 25%. ALGAR was proportionally included in the Audited Consolidated Financial Statements 2018 and the Audited Consolidated Financial Statements 2019.

The 3 Banken IT GmbH (formerly DREI-BANKEN-EDV Gesellschaft m.b.H.) was incorporated in 1992 as a subsidiary of Oberbank, Bank für Tirol und Vorarlberg Aktiengesellschaft and BKS Bank AG for the joint operation of the operating data processing centre and the development of IT applications. In a significant reorganization measure in 2006, the processes of preparing and maintaining IT applications were optimized and the tasks of 3 Banken IT GmbH were expanded to include the operation and maintenance of all IT applications and the responsibility for standards, methods and IT security. The Issuer holds 40% of the shares in 3 Banken IT GmbH.

Oberbank agrees to annual sales targets with Bausparkasse Wüstenrot AG for building loan agreements (Bausparverträge) and building society financing (*Bausparfinanzierungen*) in individual units. This target agreement is concluded each year in the fourth quarter for the following year. The Issuer holds 2.46% of the shares in Bausparkasse Wüstenrot AG indirectly through BWA Beteiligungs- und Verwaltungs-Aktiengesellschaft.

The Issuer agrees with Generali Versicherung AG sales targets for life insurance policies, accident insurance policies and for the recommender model on an annual basis. Life and accident insurance policies are advised and sold by sales employees of the Issuer. Furthermore, the Issuer refers prospective customers for property, motor and health insurance policies to the customer advisors of Generali Versicherung AG within the framework of the recommender model.

Please refer to the section "Principal Shareholders" for information on the syndication agreement among the Issuer's shareholders.

Aside from the above there are no material contracts that were entered into outside the ordinary course of the Issuer's business, which could result in any group member being under an obligation or entitlement that is material to the Issuer's ability to meet its obligations to its shareholders or the Holders.
